PARADISE, LANCASTER COUNTY,
BOX 1001 PENNSYLVANIA
A PERSONAL MESSAGE FROM PARADISE GARDENS

The many requests that have come in from old subscribers to Parks Floral Magazine for the publication of a catalogue in a style comparable in comprehensiveness of listing to the old catalogues of the La PARK SEED AND PLANT COMPANY has led us to issue this catalogue for SPRING and FALL; and its issue which has so pleased many of these old subscribers is being sent as well to many other gardeners who, may not have been subscribers of Parks Floral Magazine, but whom we hope may find it equally valuable.

There is listed here a complete selection of the rare bulbs, tubers, and other nearly related plants available in America and a selected list of such common garden flowers as Gladiolus, Narcissus and Tulips. You will find that this year, bulbs as everything else, are lower in price; and what can bring more contentment to those whose curtailed income makes necessary the limitation of many of their usual pleasures than their own gardens filled with flowers?

Prompt service as well as high quality products have always been our boast, and we shall be specially pleased to serve you at any time when you have requirements in the horticultural field; not only in bulbs, but in other types of plant and garden material; Rock Plants and Alpines, Perennial Border Plants, Water Lilies and Aquatic Plants, Roses, Deciduous and Evergreen Shrubs and Trees, Vines, etc.

Doubtless many of your friends will welcome the receipt of such a catalogue as this and to those who send in the names of ten or more of their gardening friends, we shall be pleased to include with their order a special gift of rare bulbs.

As many types of bulbs are listed here, some for early Spring planting, some for Summer planting and many for Autumn planting, you can send in your complete order now and rely upon us to ship each item at the proper season.

Trusting that this season may bring you full contentment in your garden and that you may choose PARADISE GARDEN'S bulbs to make it a happier, more beautiful one, we put our complete service at your disposal.

BUSINESS TERMS AND PRICES

Terms are strictly Cash; remittance may be sent by Postal Money Order, Express Money Order, Cheque or Draft. It is not wise to send currency or bills unless the letters are registered. One and two-cent stamps not exceeding $5.00 in amount are acceptable. Due to the cost of handling we cannot afford to accept orders under $2.00 and such orders must be returned unfilled.

Prices are for one, 12 or 100 as indicated; three are sold at the rate per 12, and 25 at the rate per hundred. These prices are quoted on present available supplies, and are subject to change without notice. If certain rare items ordered are exhausted, order will be held over until we are able to fill it.

Prices quoted include transportation and delivery charges. This service is offered in lieu of a cash discount and actually saves the clients far more than do the cash discounts, for shipping charges usually amount to ten percent of the value of the order. All stock is sent out healthy, and in good condition at time of shipment.

We guarantee all bulbs to be true to name and description, but due to contingencies beyond our control, such as treatment upon arrival, soil, climate, season, planting, care, after care, etc., we cannot assume any responsibility for their blooming or growth after planting. As our business depends upon the goodwill of our clients, we are always willing to make adjustments of goods whose failure to bloom or grow satisfactorily may be laid reasonably to our fault.

All bulbs will be sent in proper season and will be accompanied by cultural instructions to direct your planting.
ACHIMENES

Profuse blooming tuberous plants for greenhouse or conservatory. Closely allied to Gloxinias and require same culture. Three or more should be planted in a pot. They flower in the summer months for a period of 8 to 10 weeks. The tubers are very small.

AGAPANTHUS (African Lily)

UMBELLATUS (Blue Lily of the Nile). Lovely Summer and Fall flowering plant of the Amaryllis family, bearing a large number of tall, beautiful flowers in umbels. Has long blooming period. Desirable for outdoor decoration. Requires protection where winters are severe. Can be grown in tubs for the conservatory or terrace.

AGLAONEMA

COSTATUM. A dwarf-growing Aroid, suitable for the conservatory or window garden. Very compact heart-shaped leaves of dark, shining green, with white midrib and scattering blotches 1.00

(8)
ALLIUM

THIBETICA. Dwarf. Flowers lilac-mauve. Each Doz. Blooms in early summer. Rare type, fine for rock garden ........................................... .50 5.00

OTHER SPECIES OF ALLIUM FOR FALL DELIVERY

ACUMINATUM. Native. Upright heads of bright red flowers. Height 10 to 12 inches ..... .75 7.50

BREVISTYLUM (Alpine Onion). Erect umbels of showy deep rose flowers with stems a foot tall. Requires most humus soil ...........................................3.50

ALOCASIA

Tropical plants suitable for patio or water gardens. Hardy only in the far South. Otherwise use only as Summer bedding plants. Each Doz.

INDICA. Fine subject for its stiff, arrow-like leaves; deep reddish-purple and lead-green color ...........................................1.00 10.00

MACHOHIZA. Tall green leaves. Very erect and stiff ........................................... .75 7.50

ALPINA (Shell Flower)

Tuberous plant, semi-tropical; same climatic requirements as Alocasia. The green leaves have a spicy odor when crushed. Each Doz.

FORMOSANA. Pure white flowers, slightly veined crimson. Dainty but striking. Strong divisions ...........................................1.00 10.00

NUTANS. Mottled yellow-orange flowers suggest sea-shells. Strong division ...........................................1.00 10.00

ALSTROEMERIA (Peruvian Lily)

A native of Peru with a great many lovely spikes of golden yellow, orange and various shades of pink to rose flowers; some beautifully spotted. Excellent as cut flowers and keep for a long time. Should not be moved unless necessary as they do not bloom until fully established. Require sunny location, rich soil and plenty of moisture, but with good drainage. A mulch of well rotted manure is recommended for them. They are not hardy in the east, but could be stored in barely moist sawdust in the cellar during the winter. Do not disturb the roots when lifting. Each Doz.

AURANTIACA. Beautiful shade of orange with brown spots ........................................... .25 2.50

SPLENDENS. Lovely golden yellow ........................................... .30 3.00

AMAR-CRINUM

HOWARDI. A true bigeneric hybrid produced by crossing Crinum Moorei on Amaryllis Belladonna. Soft pink flowers on stems three feet tall are freely produced during the summer months. Requires the same culture as the various Crinums or Amaryllis. In cold sections it can be grown successfully in tubs for the conservatory or sun porch. Stock limited ...........................................5.00
AMARYLLIS
Lovely Lily-like flowers, shading from delicate pink to pale rose. Tall stems, no foliage while blooming, therefore combines exquisitely with blue Agapanthus which blooms at the same time, providing foliage. This combination makes an effective clump or striking border. In the warm sections of the south and on the Pacific coast the bulbs bloom freely out of doors and should be planted with the tops even with or a little above ground. Pot culture is suggested for colder sections.

BELLADONA MAJOR: Beautiful pink; early.
Bulbs should not be planted too deep. Large size .50 5.00
Medium size .................................................. .25 2.50

BELLADONA MINOR: Later than Major. Smaller flowers and deeper pink. Large size .50 5.00

BELLADONA ROSEA: Later than both the preceding. Rose pink. Very scarce 1.00

AMOMUM
CARDAMOMUM. Decorative for its foliage only.
Is of particular interest for the thick, leathery leaves which, when crushed, give out a pleasing “gingery” odor. Semi-tropical. Requires considerable moisture .75 7.50

AMORPHOPHALLUS
(Devil’s Tongue)
RIVIERI. A curious and interesting Aroid, which blooms without soil or moisture when the bulb is 4 years old. Resembles a gigantic black Calla and appears before the leaves on stems rising from 5 to 6 feet high; the flower is soon followed by interesting massive-looking foliage which is supported on thick prettily marked stems.

ANEMONE CORONARIA
For Fall Planting
The blossoms of the De Caen anemones resemble poppies, the flowers are beautiful and come in a great varieties of dazzling blues and reds. They flower in the early spring and make a wonderful carpet for a bed or border. Plant the bulbs after soaking them overnight, 1 inch deep and 6 inches apart.

DE CAEN. Single mixed .......................... .65 4.75
ST. BRIGID. Semi-double ....................... .65 4.75

ANDROSTEPHIUM-Wild Hyacinth
(Pale blue flowers shaped like a small Daffodil, blooming in early Spring

Doz. 100

Each Doz.

Strong flowering 4 year old bulbs 10.00 110.00
Strong 3 year old bulbs 4.50 50.00
Strong 2 year old bulbs 2.75 30.00
Strong 1 year old bulbs 1.25 12.50

(5)
Novelties in finest named varieties: Doz. 100

CHRYSANTHEAE FLORA. Petal-like stamens $1.00 7.00

CORNFLOWER. A wonderful fully double variety of amethyst blue $2.00 15.00

KING OF SCARLETS. Brilliant red. Tall stem. Excellent cut flower, Double $2.00 15.00

HIS EXCELLENCY. Enormous single, scarlet flower with tall stiff stem $2.00 15.00

ROSETTE. Double pink and white flowers $2.00 15.00

THE GOVERNOR. Giant scarlet semi-double flower $2.00 15.00

ANEMONE JAPONICA (Windflower)
Lovely fall flowers in many colors. The blooms are similar in shape to the Spring flowering DeCaen type, but are much taller. They bloom from September until late November. Each Doz.

ALBA. Pure single white; yellow center. 2 to 8 ft. $0.20 2.00

ALICE. Rosy-pink, lilac center; large flowers $0.25 2.50

BUHLER KIND. Early double white $0.30 3.00

KRIEMHILDE. Double, rich pink $0.25 2.50

MAX VOGEL. Double, rose pink $0.30 3.00

PRINCE HENRY. Double red flowers; dwarf $0.30 3.00

RUBRA. Beautiful rosy red; bright red stamens $0.30 3.00

WHIRLWIND. Excellent double white flowers, 2 to 3 feet $0.20 2.00

Collection of six named varieties, all labelled separately, our selection, for $1.25

ANTHERICUM LILIAGO (ST. BERNARD LILY) Each Doz.
Pure white flowers of the Lily family. Long grassy leaves. Require sun and a rich, damp soil. Fall and spring delivery $0.40 4.00

ANTHOLYZA PANICULATA. Red yellow flowers similar to Watsonias both in appearance and culture. Thrive in warm climates. Are not recommended for planting in Eastern States. $0.25 2.50

ATHHIOPICA. Dwarf. Flowers same as above $0.25 2.50

ANTIGONON (Queen’s Wreath) Each Doz.
A tuberous-rooted climbing vine bearing coral pink flowers in great profusion during the late summer and early fall months. Require full sun and the warmer the better. Strong tubers $0.40 4.00

APIOS TUBEROSA (Tuberous-rooted Wisteria). Clusters of rich deep purple flowers which have a delicious violet fragrance. Good for growing over trellises $0.15 1.50

ARISAEMA (Jack-in-the-Pulit) Each Doz.
TRIPHYLLUM. Unique Aroid for shady nooks. Dwarf canopy lily. Flower in May, followed by attractive berries in late Summer $0.25 2.50

ARRHENATHERUM
Bulbosum variagatum. Dwarf form of ribbon grass with white and green leaves. Propagates from small bulbs $0.40 4.00

ARMS
Arums are listed sometimes as Callas, one of which is Arum Pictum as “Black Calla.” These desirable plants are of easy culture, which can be used with good effect for outdoor planting, in mild climates, or are suitable as potted plants. Each Doz.

ARUM CORNUTUM (Monarch of the East). This unique bulb was becoming very popular when horticultural restrictions prohibited importations into this country. In a dry state it will, in any ordinary living room temperature, throw up an odd growth of mottled gray foliage and stalk with a semblance of flower. The same bulb can then be planted outdoors when the weather warms up and will produce a beautiful green foliage plant $1.00 10.00

Second size $0.50 5.00

For Fall Delivery Only

DRACUNCULUS Arum Dragon. Producing large purple-red spathes with blue-black spadix. Palm-like foliage, with stems mottled black. Very odd $1.00 10.00
ITALICUM. Handsome species with green and white marked foliage. The spathe shaped white flowers are followed by scarlet berries in the early fall .................................................. \$1.00 \$10.00

PICTUM (Arum Pictum). Black Calla. Very Odd \$0.35 \$3.50

ASCLEPIAS

TUBEROSEA. Umbels of bright orange colored flowers in midsummer. Requires sunny situation and rich, moist soil .................................................. \$0.35 \$3.50

BABIANA

For Fall Delivery

A curious flower blooming in spring with flowers which resemble the Freesia or Tritonia and require the same culture. Can be grown in pots. The name is from the Dutch for "baboon," as these animals eat the bulbs in the wilds of Africa.

<table>

GIANT SINGLES. Flowers are of mammoth size, often six inches across. Colors as above .................................................. \$0.20 \$2.00

GIANT DOUBLES. So double that they often have the appearance of round balls of velvet-like petals. Colors as above .................................................. \$0.25 \$2.50

CRISPA BEGONIA. An extra fine strain of single Begonia with fluted and ruffled edges. Colors same as singles .................................................. \$0.25 \$2.50

GIANT CRISPATA. The most beautiful of all. Large, ruffled edge blooms with solid crested center. Called the doubled ruffled Begonia Colors same as singles .................................................. \$0.25 \$2.50

NARCISSPFLORA. The male blooms of this type resemble a large trumpet Daffodil. Mixed pastel shades. Supply limited .................................................. \$0.75 \$7.50

PENDULA. Splendid for growing in hanging baskets or as individual specimens in pots where the branches drooping over the edge produce masses of attractive showy flowers. Choicest colors, mixed .................................................. \$0.50 \$5.00

BELAMCANDA (Blackberry Lily)

CHINENSIS. Large orange flowers, spotted brown, which last for only a short time. Belongs to the Iris family. The clusters of round, shining black seeds are said to resemble blackberries .................................................. \$0.25 \$2.50
**BILLBERGIA**

(TRANSVAAL LILY) Each Doz.

NUTANS. Tropical plant with long spikes of rose and green flowers edged with green. Can be grown outside where warm or make ideal subjects for potting or hanging baskets. Require abundance of moisture during growing season, during the summer months. Sprinkling the foliage is also beneficial, but very little water is needed during the winter .... 1.00 10.00

**BLOOMERIA**

Fall Delivery Doz. 100

Handsome umbels of bright yellow flowers on stems 12 to 15 inches tall. Native bulb ......... 2.00 15.00

**BOUSSINGAULTIA** (Madeira Vine)

Each Doz.

BASELLOIDES. Rapid growing vine; heart shaped leaves of light green with racemes of feathery flowers, delightfully fragrant. Commonly called "Mignonette Vine" .... 20 2.00

**BRODIAEAS**

Fall Delivery

These plants have a small bulb, producing grassy leaves near the ground, and very slender, but stiff, naked stems bearing a head of waxy flowers of great lasting quality. All are pretty. Their culture is the same as for Narcissi, and just as easy. These flowers are easily naturalized in almost any soil. Plant them about three inches deep, and leave them alone. They are especially happy under oak and deciduous trees, in crevices in rocks, or in rough spots.

CALLA (Zantedeschia)
The so called RICHARDIA or Calla Lilies strictly speak¬
ing are all “ZANTEDESCHIA” after Francisco Zantedeschi,
an Italian Botanist. The only true “Calla” being C. Palu¬
tris, a native species of some of the eastern states.
Arums are also listed sometimes as Callas, one of which is Arum Pictum as “Black Calla.”
These desirable plants are of easy culture, which can be used with good effect for outdoor planting, in mild climates, or are suitable for potted plants.
For Fall planting. Ready in September

AETHIOPICA (Lily of the Nile). The large white Calla. Tall ...................................................... 25 2.50
DEVONIENSIS (Godfrey or Little Gem). Dwarf white variety. Free blooming .................................. 35 3.50

SPOTTED LEAF CALLAS

ALBO-MACULATA. Ivory-white, dagger shaped leaves, spotted .................................................. 30 3.00
ELLIOTTIANA. Finest, rich golden yellow flow¬
ers, medium height. Large bulbs ......................... 35 3.50
CALLA PALUSTRIS (Wild Calla). For water garden ........................................................................ 35 3.50

CALOCHORTUS
Lovely native bulbs many of which grow wild on our Western Coast. They require a well drained loamy soil. If soil is heavy, lighten with grit sand and leafmold. In Eastern states: plant the bulbs in a protected spot and cover with four inches of dried leaves during winter. There are several forms of Calochortus which can best be de¬
scribed in separate groups.

BUTTERFLY TULIPS

CITRINUS. Deep rich yellow with black eye. Most excellent ........................................... 75 5.00
EL DORADOS. Selected shades from soft pink to deep claret are wonderfully attractive ............... 1.00 6.50
OCULATUS. Variegated shades of white and cream, tinted purple. Flowers very large ....................... 1.00 7.50
PUSPERASCENS. Superb flowers; lilac to purple, darker on outside petals .................................. 75 5.00
ROSEUS. Beautiful bloom with large flowers of creamy white suffused with lilac. A rose colored blotch on each petal .................................................. 1.00 7.50
VESTA. White, flushed with lilac; throat red and purple on black petals ........................................ 1.50 10.00

STAR TULIPS (Cat’s Ears)
Dainty slender-stemmed flowers, fine for rockwork and woodlands. When the flowers are open they show a lining of long hairs which suggest cat’s ears.
LILACINUS. Low growing flowers of clear lilac. Not hairy inside ............................................... 1.00 6.00
LOBBEL. Cream, with bright yellow center .................................................. 1.25 7.50
MAWEANUS. Soft lavender, low growing .................................................. 1.25 7.50
MONOPHYLLUS. Bright yellow .................................................. 1.25 7.50
Mixed Varieties ........................................................................ 75 5.00
GLOBE TULIPS OR FAIRY LANTERN

These dainty woodland flowers differ from the Mariposa Tulips by their globe shaped blooms from which they get their name, but the same culture is required by them.

**Doz. 100**

**ALBUS.** Lovely white flowers, rather tall and slender, with leaf-wrapped stems. Ideal for shady nooks .................................................. .75 5.00

**AMABILIS.** Rich yellow ........................................... .75 6.00

**CHOICE VARIETIES.** Mixed ........................................... .65 4.50

CAMASSIAS

**CALIFORNIA WILD FLOWER**

There are few bulbous plants that meet climatic or soil conditions better or give a more attractive bloom. They are hardy without protection, and thrive either under ordinary garden conditions or when naturalized in open moist woods or in not too dense a grassy growth. The flower stems are 2 feet high with as many as a hundred star-shaped flowers measuring 1 1/2 inches across and flowering in long succession. September delivery.

**Doz. 100**

**ESCULENTA.** A purple form, rich in color. Grows 2 feet high. Very showy in masses .............................. .65 4.50

**LEICHTLINI.** (Sky blue). Grows 3 feet high with as many as one hundred flowers of the finest form, star shaped and about 1 1/2 in. across, flowering in long succession .......................... 1.00 6.00

**LEICHTLINI ALBA.** White form of the above ........................ 1.25 8.00

**MIXED.** .......................................................... .75 6.00

CANNAS

For Spring planting. Ready in December

Cannas have always been in demand and now with the wonderful new colorings and the improved size of flowers, they are even more popular. The large, handsome, ornamental foliage and beautiful spikes of bright flowers make the canna ideal for mass plantings, backgrounds, borders or hedges. They may now be obtained in heights varying from 3 to 6 feet, and in colors of rose, orange, to pure white. Also some foliage is bright green and some a rich bronze.

**Doz.**

**ALSACE.** Pale sulphur, changing to cream white. Green foliage. 4 feet ................................................. 2.00

**AMERICAN BEAUTY.** Oriental carmine or cerise. Green foliage. 5 feet ................................................... 3.00

**APRICOT.** Buff-yellow base, overspread with salmon-pink ................................................................. 3.00

**BEACON.** Moderate sized flowers borne in great heads of rich cardinal red ........................................ 2.00

**CHEERFULNESS.** Its beautiful bright fire-red or deep orange flowers appear early and continue without interruption until frost ................................................................. 3.00

**EGANDALE.** A fine bronze-leaved variety; cherry-red flowers, borne well above the foliage; handsome. 4 ft...1.75

**FIERY CROSS.** Very large flower heads of vivid scarlet shading to crimson; foliage lustrous blue-green. 5 ft...2.50

(10)
GAIETY. Reddish orange, mottled with carmine and edged with yellow. The tongue is yellow and densely spotted with carmine 1.75

GLADIOFLORA. Remarkable on account of the unusual shape of its flowers, which look like Gladiolus; color crimson changing to carmine-rose, with an irregular edge of gold. Four feet 1.75

LOUISIANA. Orchid-flowered. Very large trusses of vivid scarlet flowers; free bloomer 3.00

MORNING GLOW. Foliage an olive-green striped and veined with brown. Flowers soft shell pink and orange-red center. Four feet 3.00

ORANGE REDDER. This is a particularly useful and attractive bedding variety, of a bright orange with just enough scarlet suffusion to intensify the dazzling mass of color 2.00

PANAMA. The color of this splendid Canna is unusual being an attractive rich orange-red yellow. Very large, flowers. Early, free-flowering habit and unique coloring make this Canna most noteworthy. Three feet 1.75

SAN DIEGO. Persian yellow, with crimped petals. Four feet 2.50

THE PRESIDENT. A gorgeous variety producing great trusses of bright red flowers in great profusion 2.50

WINTZER'S COLOSSAL. Largest-flowered Canna. Vivid scarlet in color 1.75

Mixed colors 1.50

1 each of 12 named varieties; full range of colors, but our selection 1.00

CHIONODOXA (Glory of the Snow) For Fall Delivery

One of the most lovely of our spring flowering bulbs. Some flowers are brilliant sky-blue, with white center, while others are pure white. Doz. 100

GIGANTEA. Soft lavender 65 4.50

LUCILIAE. Beautiful blue with pure white center 30 3.50

LUCILIAE alba. New, pure white flowers of charming beauty. Very rare 4.00

SARDENSIS. Intense bright blue 50 4.00

TMOLUSI. Bright blue and white 2.00 12.00

CHLIDANTHUS Fragrans

Sometimes called "Delicate Lily." The name doubtless refers to the clear rich yellow flowers, which resemble a miniature Amaryllis. Very fragrant. Hardy when well mulched 25 2.50

CHLOROGALUM (Soap Root) Fall Delivery

Each Doz.

Native bulb with curious rosette shaped foliage; tall stalks bearing open panicles of small white flowers 25 2.50

CLINTONIA

ANDREWSIANA. Small low-growing herbaceous plant, with broad shining leaves and umbels of rose pink flowers. They require a cool, shady situation in a rich soil in leaf mold 35 3.50

BOREALIS. Flower-stalks are about 6 inches high, bearing at the top a few rather large, greenish yellow, lily-like flowers in early spring. Plant in a cool, shady place 25 2.50

CLIVIA (Imantophyllum) (CLIVE LILY) Each Doz.

Tender bulbous plants with handsome evergreen foliage and large umbels of flowers of bright scarlet with yellow throat. A native of S. Africa and named for a Duchess of Northumberland and member of the Clive family. Make excellent house plants; spring flowering 1.00 10.00

COLCHICUM

Crocus-like flowers of soft Mauve, blooming late in summer. flowers appear before leaves. Will flower without soil or water if in a sunny spot, but should be planted in the open ground soon after the flowers fade. Very odd

AUTUMNALE. Commonly called Autumn Crocus. Very free bloomer 25 2.50

AUTUMNALE ALBUM. Pure white. Quickly establishes itself in strong clumps 50 5.00

(11)
Each £>oz.

**AUTUMNALE ALBUM PLENO.** Beautiful double white ........................................... 1.75

**AUTUMNALE MAJOR.** Large growing variety with massive flowers of rosy purple ........................................... 50 5.00

**BORNMULLIERI.** Fine cup shaped long-tubed flowers of rosy lilac. One of the finest species. Early flowering ........................................... 75

**SPECIOSUM.** Deep rose purple, very large and fine ........................................... 50 5.00

**SPECIOSUM ALBUM.** White, very large ........................................... 1.75

**COLOCASIA**

Each Doz.

**ANTIQUORUM ILLUSTRIS (Black Caladium).** Subtropical foliage plant. Leaves blotched vel¬
vety black ........................................... 75 7.50

**MONORRHIZA NIGRA.** Leaves velvety green on purple stems ........................................... 75 7.50

**CONVALLARIA MAJALIS**

**LILY OF THE VALLEY**

For forcing, the pips are to be preferred, being grown under conditions tending to promote vigorous and early blooming. Twelve to eighteen pips may be planted in a 6-inch pot with all the fibrous roots carefully preserved, and keeping the crowns above the soil. Place them in a temperature of about 80 degrees, cover the crowns with loose moss and keep them constantly moist with tepid water.

Doz. 100

Selected crowns for forcing ........................................... 65 4.75

Clumps of several crowns or buds best for plant¬
ing outside ........................................... 3.50

**COOPERERIA**

Each Doz.

**DRUMMONDII Evening Star).** Native of Mexico, Pure white flowers, very fragrant, blooming in the evening. Culture similar to Zephyranthes ........................................... 35 3.50

**PEDUNCULATA (Prairie Lily).** Similar to Drummondii, but larger and blooms for a long¬er period ........................................... 50 5.00

**CRINUM — C. E. HOUDYSHEL**

**CRINUMS**

Although Crinums are tropical plants, they do well in this climate when given some protection. It is advised to plant about 12 inches deep and near a wall, or cover with leaves, and may be grown inside in a large pot or tub.

Each

**AMABILE.** Immense, dark green leaves. Stems purp¬lish red; many glossy pink flowers; very fragrant ........................................... 1.50

**AMERICANUM.** Beautiful plant producing umbels of large lily-like white flowers ........................................... 75

**ALVATUM.** Large species, forming a magnificent rosette of dark green leaves. Clusters of fragrant white flowers ........................................... 1.50

**CAMPANULATUM.** Vigorous plant with wavy-margin¬ed strap-shaped leaves. Spikes of lovely bell-shaped flowers; white with pink stripes ........................................... 1.25

(12)
Each

C. E. Houdyshel. Hybrid. The nearest to a red flower. One bulb will often bloom four or five times in one year

CAPENSE ROSEA. Pink. Hardy. ............. 1.50
CAPENSE ALBA. Same with white flowers ........................................... 1.50
EMPERESS OF INDIA. Large plant, produces freely all summer. Umbels of drooping flowers, deep rose-color striped flesh pink ........................................... 2.00
ERUBESCENS. Flowers reddish outside, white inside. Native of Tropical America. Lovely plant for the conservatory or greenhouse ........................................... 5.00
FIMBRIATUM. Pure white with lavender-pink stripes through center of petals ........................................... 5.00
GIGANTEUM. Considered one of the most beautiful species. Large pure white flowers with vanilla-like fragrance. Handsome, rich green foliage ................. 2.50
J. C. Harvey. Hybrid. Flowers rosy-pink; large with drooping habit. Very fragrant. Blooms several times during a year ........................................... 1.50
KIRKI. Large white flowers with a reddish-purple stripe down the center of each petal on the outside, which shows through and gives the flower a pink tinge on the inside. The very beautiful wavy-edged leaves form a perfect rosette. The entire plant has a very rich tropical appearance ........................................... 5.00
KUNTINUM. Native of New Granada. Flowers dull white, tinged rose-red, produced abundantly ........................................... 5.00
MOOREI. From Africa. Does best in partial shade. The whole plant is of a very beautiful form, flowers clear pink ........................................... 5.00
MRS. BOSANQUET. Hybrid. Large cup shaped blossoms of deep, glowing rose. One of the finest Crinums in the lot ........................................... 3.00
POWELLI ROSEA. A very popular and beautiful hybrid with pink flowers resembling a lily; hardy ................ 5.00
POWELLI ALBA. Same with white flowers ........................................... 5.00
PEDUNCULATUM. White, tinged green. The bulb grows nearly on top of the ground on large rootstock ........................................... 2.00
SABBATUM. Leaves light green with wavy edges. Flowers dull white changed to rose ........................................... 1.25
VIRGINICUM. Large flower of white and soft rosy pink ........................................... 1.00

Collection of 6 choice Crinums, all different and labelled separately, our selection, $2.75.

Special collection of 12 choice Crinums, all different and labelled separately, our selection, $7.50.

CROCUS For Fall Delivery

Very early flowering Spring bulbs for planting in lawns, borders or terraces. Bulbs should be planted in October. They can also be grown in bowls with prepared fiber or pebbles.

CAESAR. Purple, fine large flower.
PRINCE ALBERT. Deep blue.

MADAME MINA. Light lilac striped.
PRINCESS LOUISE. Deep purple with light stripes.
SIR WALTER SCOTT. White, striped pale lilac. Doz. 100 Above varieties ............ 3.50

Mixtures of Crocuses

Mixed White.
Mixed Mixed White.
Mixed Striped.
Mixture ........................................... 2.50

WILD CROCUSES SPECIES FOR ROCK GARDEN OR BORDER

Besides the Dutch Crocuses there are certain species that blossom much very earlier in the year, often before the snow has gone. The flowers of these wild sorts are smaller than those of the Dutch kinds, but they are as vigorous and free as the others. Given a sunny position in the rock garden, or a sheltered position in grass where the sun may encourage them freely, they will surprise you by their hardy appearance in the face of cold and storms.

WILD AUTUMN-FLOWERING SPECIES

Doz. 100
ASTURICUS. Deep violet ........................................... 3.00 22.50

**BEAU BRUMMEL** (Boston). Purple. A low growing variety that is a heavy producer of good blooms. This variety in general reminds one of a very exaggerated Purple Manitou.  
1.50

**BLACK JACK** (Hodgens). Deep maroon, almost black. One of the darkest of all dahlias and a robust grower. The flowers are large and stems good. Decidedly attractive.  
1.00

**CHAMPAGNE** (Boston). Dull, golden champagne. Entrancing color and an irresistible dahlia in every way. Large flower, extra long stem, lasts a long time on the bush as well as when cut.  
.75

**CHARLEMAGNE** (Ballay). Clear carmine yellow. A very large flower with broad, heavy, loose petals. Plant is low growing and free blooming. Very good for garden decoration.  
3.50

**DONNA CALIFORNIA** (Ballay). Deep rose pink suffused lavender. Largest Dahlia in this color.  
10.00

**EARL WILLIAMS** (Doolittle). Bright scarlet regularly tipped white. A very beautiful striking color combination that is a first class dahlia in every way. Good fancy dahlias are few and this one is especially meritorious.  
1.00

**ELLINOR VANDEVEER** (Seal). Garving rose pink. An exceptionally beautiful dahlia of good size and with all the other qualities necessary to place it in the highest class.  
.75

**FAITH GARIBALDI** (Boston). Clear rose pink. A gold medal dahlia that has won many prizes. In our garden it has been a model of perfection. Flowers were large and well formed, the stems long and stout, the bushes loaded with blooms.  
2.00

**THE HONORABLE NESTOR** (McWhirter). Golden orange. Free blooming, upright growing variety with good stems. If well disbudded it will be found very useful for all purposes.  
1.20

**MRS. JESSIE K. PRESCOTT** (Boston). Deep orange at the center gradually shading lighter on the rows of outer petals. A very brilliant and pleasing dahlia that would be admired anywhere. The rich coloring is its outstanding characteristic.  
1.00

**VOILET GIVENS** (Do LLC). Combining the best of white and red. It differs from Earl Williams in that the white predominates.  
1.00

**OLIVE REED** (Seal). Clear bright yellow. A very large heavy decorative flower with a very full center which is closed at all times. It is not unusual to have 10 or 12 magnificent blooms at one time on a bush and the stems are always straight and strong.  
4.00

**SHADOWS LAVENDER** (Boston). Silvery lavender shading to white. This exceptional dahlia with every point has the number of your name and is outstanding dahlia of lavender coloring.  
2.00

**SUSAN G. TEVIS** (Boston). Deep lilac. This is an unusual shade and some of the flowers are lightly penciled with white. The foliage is dark and is in fine contrast to the large graceful blooms.  
1.50

**TOMMY ATKINS** (Boston). Brightest scarlet. A new and very brilliant shade. The refined but irregular formation of the large flower is very striking. Stem is the best possible and the blooms are freely produced.  
1.00

**TRYPHINE** (Seal). Shell pink with darker reverse. Large flower on strong stem. Good keeper.  
1.00

**WALTER E. MAGEE** (Salbach). Large decorative flower of exquisite formation, color, and substance. Buff suffused with carmine.  
3.00

**WIZARD OF OZ** (Do LLC). Bright salmon pink. Mammoth blooms of exquisite formation, robust grower. This dahlia has a great host of admirers.  
2.00

**CACTUS DAHLIAS**

- Long, narrow, pointed petals, full of the center, resembling a chrysanthemum. The American cactus is coarser than the English type, but not as heavy or large as the Hybrid cactus. Each

**ALICE WHITTLER** (Reed). pale yellow. Was judged the most perfect bloom in the San Francisco Show in 1926. A large, full flower, very ornamental in the garden as the blossoms are numerous and hold out well on the rigid stems.  
2.50

**BALLETT GIRL** (Boston). Solid orange, edge orange-edged white, sometimes on the same bush. English type of good coloring, formation and stem.  
1.60

**CORONA**. Clear yellow English cactus. Numerous florets, which though only slightly incurved form a very pretty flower.  
1.00
CONQUISTADOR (Bally); Hyb. Cactus. Awarded gold medal for the best Dahlia at the San Leandro Flower Show. The flowers are a beautiful soft creamy yellow shading to a glowing pink at the base of the petals. Excellent cut flower. 5.00

DAHLIAMUM (Bally); Hyb. Cactus. Clear bright yellow. This Dahlia resembles a Chrysanthemum very much, hence its name. Excellent cut flower. 3.50

DOROTHY DIX (Boston). Silvery pink. Huge hybrid with distinctly incurved, evenly rolled petal formation. Plants grow tall and sturdily and produce excellent flowers for flower and late. Stems are long and stiff. Excellent 1928 introduction 10.00

EL GRANADA (Boston). True bright orange with a yellow reverse. The hybrid cactus with all good qualities, most lovely color, largest size, stands the warmest sunshine unusually well. 2.00

GALATEA (Boston). Soft yellow with a very slight pink suffusion. The numerous blooms are composed of long wavy petals and are carried on long stiff stems. 1.00

JERSEY'S RADIANT (Waite). Bright orange. Long stemmed, free flowering variety of best formation. Favorite cut flower, hybrid. 1.50

REGENT (Boston). Lavender pink. Large flower with numerous long rolled petals completely covering the center. American type. 1.00

Rollo Boy (Pelicano). Light yellow with pink suffusion. Very large hybrid that blooms freely till frost. The formation, the size, the growth are beyond criticism. 1.00

SOLE MIO (Lohrmann). Bright yellow. Extra large hybrid that was a gold medal prize winner in 1925. Fine habits, good color for garden or exhibition. 2.00

ZANTE (Boston). Pure gold with a slight pink suffusion. A consistent bloomer which keeps its size and center to the end of the season. Stiff stems. Hybrid. 2.50

PEONY DAHLIAS

Semi-double flowers showing a bright yellow center, often having small twisted petals circling about the center. Each

CITY OF PORTLAND (Gill). Clear rich yellow. True peony type formation. Exceptional bloomer. Very conspicuous. 1.00

GORGEOUS (Boston). Golden yellow shading to scarlet. Large size, best of stems, freedom in blooming, good keeping qualities when cut. 1.50

THE ORIOLE (Burns). Reddish orange and yellow. Occasionally a flower is tipped with white. Big bright blossoms with good stems and especially free blooming. 1.00

POM PON DAHLIAS

Very small compact flowers. The smaller the better, so do not require disbudding. Each

ACE OF DIAMONDS. Bright red. 1.00

AIMEE. Bronze. 1.00

ANITA. Bronzy old rose. 1.00

ANNE DONCASTER. Soft yellow and mauve. 1.00

BAR ON. Bronzy red. 75

DANDY. Bright orange. 75

DEE DEE. Pure lavender. 50

DONALD. Deep red. 1.00

EDITH. Yellow heavily tipped brownish red. 50

ELIZABETH. Orange tipped red. 50

EUNICE. Pale lavender shading to white. 50

GOLDEN OLD rose. 50

JOAN. Yellow suffused with red. 50

JOHNNY. Maroon. 50

LITTLE BEESWING. Bright red shading to yellow. 50

LITTLE DAVE. Light orange. 50

MACBETH. Light pink tipped with rose. 50

MAJOR. Deepest old rose shading to yellow. 75

MIKE. Burnt orange. 75

PEE. Soft yellow shaded at center. 50

RENO. Old rose shading to gold. 50

YELLOW GEM. Light yellow. 1.00

DAHLIA MAXONI (Tree Dahlia)

Unique species of Dahlia growing 8 to 10 feet high with beautiful pink flowers. Very scarce. Each $5.00

DAHLIA COLTNESS HYBRIDS

Dwarf single flowers of crimson, salmon, yellow and maroon. Are a mass of bloom all summer and fall. Each Doz. $5 3.50

EREMURUS (Foxtail Lily)
For Fall Delivery

A noble group of hardy plants native of India. When established will send up spikes six to ten feet high. Has hundreds of bell-shaped flowers. Slight protection needed in severe climates.

- BUNGEE (Amarantinus). Citron-yellow flowers 6.00
- ELWESII (Elwesianus). Soft-shell pink 9.00
- ELWESII ALBUS (Elwesianus Albus). Pure white 9.00
- HIMALAICUS. Pure white 4.00
- HIM-ROB. Silvery pink hybrid. Unusually beautiful 4.00
- ROBUSTUS. Rosy pink 4.00
- SHELFDORF. Coppery yellow or orange 5.00
- TUBERGENI. Pale yellow 5.00
- WAREII. Coppery-pink. Flowers tinged with brown 9.00

Collection of 1 each, our choice, of 6 varieties for 25.00

ERYTHRINA (Coral Plant)

CRISSA GALLI. Interesting flowering plant for the garden, growing from 4 to 6 feet high and producing long spikes of large crimson, pea-shaped flowers from late September until frost. The roots may be stored in the cellar the same as Dahlias. Strong roots. Each 1.50

EUCHARIS (Amazon Lily)

AMAZONICA. Recommended exclusively for indoors and requires to be well established for good production of flowers. Bears two or three white Narcissus-like flowers. Very scarce 1.00 10.00

EUROPS (Pineapple Lily)

PUNCTATA. Half-hardy cape bulb producing rosettes of long leaves and a strong scape or stock, bearing a raceme of whitish flowers in the Spring, which are crowned with a crest of leafy bracts similar in shape to the topknot on a pineapple. It is from this leafy crown that the name is suggested. In warm climates let the bulbs remain where planted in the open. Treat as a houseplant in the East. Each 1.50

ERYTHRONIUM (DOG’S-TOOTH VIOLET)

For Fall Delivery

These are charming woodland plants, producing in early April, small, lily-like flowers of which the colors run in delicate tints of white, pink, cream, bright yellow and rose. They thrive in shaded corners or crevices of rock work. Their beauty is enhanced by their richly mottled leaves. They like a light, rather moist, but well-drained soil. Plant the corms about three inches deep. The following varieties are the best and all are hardy.

- CALIFORNICUM. Cream colored, often with 4 or 5 flowers on the stem. Leaves richly mottled. A large colony is a beautiful sight 60 4.50
- CITRINUM. A native of Southwestern Oregon; is rather stouter in habit than the last; flowers creamy at the outside, citron center 50 3.75
GRANDIFLORUM ROBUSTUM. A most distinct species, usually found in the mountains of the West. The leaves are not mottled, but a plain green. The flower are of the brightest buttercup bright yellow buttercup yellow buttercup yellow. HENDERSONI. Like Californicum, but the flowers are of a lovely light purple with the centers a deep maroon, almost black. Most striking. HARTWEGI. Perhaps the most lovely of all Erythroniums. With the stout habit of this group, it has exquisite rose pink flowers. From the coast al region of Oregon. The above named varieties are the best and all are hardy. MIXED.

FREESIAS For Fall Delivery Freesias have well shaped tubular flowers of many beautiful shades, all of which are now supposedly originated from one South African species, F. refracta. Their popularity is increasing each year as the new hybrids in beautiful shades are becoming known. Their culture is the simplest. Plant in rows or masses in any good garden soil and where they have plenty of sun, or in cold climates may be grown in the greenhouse, as they force easily. Bloom profusely in early Spring. Should be planted in the early fall.

MIXED...50 3.75

FERTILILLARIA (Mission Bells) For Fall Delivery IMPERIALIS (Crown Imperial). One of the most characteristic plants of old fashioned gardens. It is the most robust of all the species. The flowers are borne in umbels on stout stems 3 to 4 feet high. Mixed varieties...5.50

MELEAGRIS (Guinea Hen Flower and Checkered Lily). These produce in early April, dwarf pendent, bell-shaped flowers in various shades of color, curiously checkered, striped and splashed. They are very effective in colonies, requiring a somewhat dry situation. Invaluable for mass planting in the meadows, and for naturalizing.

Each Doz.

LANCEOLATA. Green and brown mottled. Very pretty...15 1.25

RECURVA. Orange-scarlet flowers resembling a lily...15 1.25

MIXED...1.00

GALANTHUS (Snowdrops) For Fall Delivery Dainty little pendulous flower which bloom early in the spring. The bell-shaped flower is white tipped with green. They prefer a cool, moist situation. Nivalis Simplex, single...60 4.00

Nivalis Flore Pleno, double...75 5.50

Elwesii, extra large species...65 4.75

(19)
GALTONIA (Cape Hyacinth)

Each Doz.

CANDICANS. Native Cape bulb having large handsome white flowers, growing 3 to 5 feet in height gracefully surmounted with from 20 to 30 bell-shaped umbels ........................................ 25 2.50

GLADIOLUS (Sword Lily)

Wonderful progress has been made in recent years in the improvement of the named hybrids, in size, color and beauty of the flowers. Our list comprises only the best both in named varieties and in mixture.

The culture of the Gladiolus is of the simplest. The bulbs may be planted from December to May. For early planting, full sunlight is desirable. For the later planting, a partially shaded location should be chosen.

The bulbs should be set 4 inches deep, 6 inches apart. Water frequently and cultivate after each watering. This will insure larger and better flowers. After the bulb has blossomed, cut the flower stem, leaving four leaves. Allow the bulb to ripen in the ground and when the leaves have turned brown, dig the bulb and store in a cool dry place.

The name after each variety refers to the originator if known.

RECENT INTRODUCTIONS OF GLADIOLUS

Each Doz. 100

A. B. KUNDERD (K-1918). Tall, large, intensely ruffled flower, delicate downy stem, with pink and yellow markings. Large .......... 20 2.00 12.00

A. W. HUNT (Christy). A beautiful glowing carmine red, extra large and very attractive. Gold stripe through center of petals .... 35 3.50

BEACON FAME (Glory of War) Self colored vermilion scarlet. Large ........................................ 50 5.00

BENGAL TIGER (Pratt). Large blossoms of a peculiar shade of smoky red, striped and lined with smoky blue-grey. Barbarically gorgeous. Large ........................................ 15 1.50 10.00

CAPTAIN BOYNTON (Boynot). Large, light lavender, with darker spots on lower petals—very fine. Large .......... 25 2.50 15.00

CHATEAU THIERRY. Bright cerise with carmine spots on lower petals. Enormous wide-open flower 4 to 6 inches diameter. Fire spike, excellent grower. A sensation wherever exhibited. Large .......... 20 2.00 12.00

COWEES SCARLET WONDER (Groffs). Large, glowing, brilliant, velvety pure scarlet flowers. A very fine red. Large .......... 25 2.50 15.00

DAVID STARR JORDAN (Dienner). Immense flowers of intense flame color with lighter speckled throat. Large .......... 25 2.50 15.00

DIENERS AMERICAN BEAUTY. American Beauty rose color, creamy yellow throat—many open at one time—each spike a bouquet in itself. Large ........................................ 20 2.00 12.00

DUCHESS OF YORK (Dames). Dark blue, Called an improved Baron Hulot. Large .......... 35 3.50 20.00

FAY LANPHIER (Williams). Warm watermelon pink suffused coral, often having a crystalline texture on the petals as if frost-cracked. Large ........................................ 20 2.00 12.00

FERN KYLE (Coleman). Ruffled, very large, creamy white with slight amaranth purple in throat. Large ........................................ 35 3.50 20.00

GLANT NYMPH (Williams). Immense rose pink flowers with creamy yellow throats borne on tall erect stems. A wonderful glad. Large ........................................ 35 3.50 20.00

HELEN TODD (Dienner). Light rose pink, deeply edged around each petal, throat deep scarlet. Large ........................................ 15 1.50 7.00

(20)
HENRY FORD (Diener). Very dark, rhodamine purple shading into deeper tones near the center. An improved Anna Eberius.
Large .................................................. 25 2.50 15.00

JACOBA VAN BEYEREN (Holi). Large flowers of pure violet on tall erect stems; well arranged and many open at one time.
Large .................................................. 25 2.50 15.00

LOS ANGELES (Houdyshel). Immense spikes bearing huge blossoms of shrimp pink with throat of orange tinted carmine.
Large .................................................. 25 2.50 15.00

MRS. F. C. PETERS (Fischer). Fine rosy lilac blossoms with soft crimson blotch; slightly ruffled and many opened at one time. Tall, vigorous and fine. Large ............ 20 2.00 12.00

MRS. HARDING. Mauve colored flower with feather markings. Large .... 25 2.50 15.00

MR. MARK (Velthuys 1916). A pleasing shade of light blue with dark blotch
Large .................................................. 20 2.00 12.00

MRS. LEON DOUGLAS (Diener). Enormous rose colored blossoms striped with scarlet. Extra long spikes. Large ................................. 25 2.50 15.00

PARAMOUNT (K1918). A wonderful blending of pink and cream. Similar to Mrs. Dr. Norton. Large ......................... 50 5.00 30.00

PROF. A. C. BEAL (Kirchoff). Deep maroon a flower of good merit. Large ......................... 50 5.00 30.00

PURPLE GLORY (K1926) (R). Deepest velvety maroon-red with almost black blotches. A perfect giant among gladiolus. Recommended. Large ................................. 25 2.50 15.00

ROBERT KUNDERD (K-1919). Medium tall, very brilliant orange vermillion. Very showy self color. Large ......................... 35 3.50 20.00

SIR ROGER CASEMENT (Diener). Dark maroon—heavily ruffled. Large ......................... 35 3.50 20.00

QUEEN OF THE BLUES. Light pinkish lavander. Small burgundy blotch on yellow ground on lower petals. Tall spikes well arranged. Large ................................. 25 2.50 15.00

THOS. T. KENT (Diener). Very attractive flower, combination of strawberry and shell pink. Large ................. 25 2.50 15.00

WHITE GLORY (K 1915). Pure white with an iris blue throat. Intensely ruffled
Large .................................................. 20 2.00 12.00

MIXED GLADIOLUS. All colors .......................... 50 3.00

MIXED RUFFLED GLADIOLUS .......................... 75 5.00

(21)
GLADIOLUS COLVILLI AND NANUS TYPES
MINIATURE OR BABY GLADIOLUS
The culture of these Miniature Gladiolus is very easy. Plant from October to December and you will be rewarded with wonderful blooms in May and June. Plant the bulbs 6 inches apart and 3 to 4 inches deep. Mass planting is very effective. The flowers are borne on long slender stems and are in great demand as cut flowers. Requires protection.

Doz. 100

APHOLLO. Salmon with dark throat ............................ 7.5 6.00
BLUSHING BRIDE. Ivory with carmine throat .......... 7.5 6.00
BRILLIANT. A brilliant scarlet .............................. 7.5 6.00
CRIMSON QUEEN. Deep crimson ............................ 7.5 6.00

THE BRIDE. Pure white ........................................ 40 3.00
MIXED BABY GLADIOLUS. Good assortment ........... 50 3.50
HERALD GLADIOLUS
A unique type of Gladiolus, blooming several weeks earlier than the Colvillei or "Baby Gladiolus" and several months earlier than the large summer varieties. Each flower is about 4 inches across on stems 3 to 5 feet tall. Requires same culture as miniature Glads. Each Doz.

JOOST VAN VONDEI. Scarlet with white blotch .... 50 5.00

GLADIOLUS SPECIES FOR SPRING PLANTING
The greater part of the improved garden forms of Gladiolus are derived indirectly from South African species of which there are over a hundred now known, which are unique both in shape and color.

Each

DEACOCEPHALUS (The Dragon Head). Hooded green flowers, striped yellow .................................................. 50
PRIMULINUS (Maid-of-the-Mist). A little wild yellow "Glad" growing about the foot of Victoria Fall, in Africa .......................................................................................... 35
PSITTACINUS (The Parrot Glad). Another hooded species with red, green and yellow flowers. Rare and seldom seen in this country .......................................................... 2.50
QUARTINIANUS. Tall species with large flowers of red and yellow that bloom late in summer ................. 50
SAUNDERSI. Large bright scarlet blossoms with white blotch in throat. Not easy to grow, but well worth the effort if successful ........................................... 10.00

Gladiolus Species for Fall Planting Each

ANGUSTUS. White marked purple; 2 to 3 feet ............. 7.50
CULIS. Pale pink with carmine markings .................. 4.00
CARDINALIS ELEGANS, The "Superb Gladiolus." Long spray of Carmine red and salmon colored flowers with white throat. This species is from South Africa, therefore should be grown in the window garden, in cold climates, or started in flower pots in cold frames, until danger of frost is past. This is one of the most beautiful of all the wild Glads and is very rare in this country. They bloom from May to the end of June and grow 3 to 4 feet high. Each .......................................................... 1.50
CUSPIDATUS. Creamy-pink with carmine throat mark¬
ings ................................................................. 3.00
ICHILI. Flowers orange and red. Flowers very beautiful and graceful ..................................................... 5.00
TRISTIS CONCOLOR (The Fragrant Glad). Height 3 to 4 feet. A most interesting species from the Cape. The stems are tall and slender and should be well staked. It may be planted out of doors in mild climates, but requires the same culture as Freesias in the Northern or Eastern States. The flowers which are rather large considering the slender stems, are cream with brown spots. A sweet fragrance, simi¬lar to that of a Hyacinth, but not as heavy, is noted after sunset. Each ............................................. 1.50
Mediterranean Species

BIZANTINUS (Turkish Corn Flag). Native of Asia Minor, about 2-3 feet high and is hardy except where winters are severe, in which case they should be planted in a protected spot and covered with a heavy mulch. The color is purple or wine color. Blooms in May. Each $1.25

COMMUNIS. This dainty little wild Glad comes from Central Europe and is perfectly hardy in most of the Eastern States. The spike is 1½ to 2 feet tall and the blossoms are rich mauve or deep lavender. Blooms here in May. Supply limited. Each $1.00

GLOXINIA

One of our handsomest summer blooming tuberous-rooted plants. It makes a very fine pot plant, requiring about the same cultural directions as Begonia. One bulb to a 4-inch pot. The colors range through pink, scarlet, violet and white bordered. Each Doz.

BRILLIANT. Carmine-scarlet $0.50 5.00
BRUNHILDE. Giant flowered, pure white $0.40 4.00
CORONA. Indigo; magnificent $0.45 4.50
DUKE OF YORK. Scarlet, edged white $0.50 5.00
EMPEROR FREDERICK. Vivid scarlet with white band $0.50 5.00
EMPEROR WILLIAM. Deep violet with white margin $0.45 4.50
FIRE KING. Robust dark scarlet $0.40 4.00
HER MAJESTY. Lovely pure white $0.35 3.50
CYCLOPE. Brilliant carmine with broad white margin. Spotted throat $0.35 3.50
MAUVE PRINCESS. White with mauve margin $0.40 4.00
WATERLOO. Deep purple, curled carmine border $0.50 5.00
Mixed Varieties, large bulbs $0.35 3.50
Spotted and Netted Hybrids $0.35 3.50

HEDYCHIUM (GINGER LILY) Each Doz.

CORONARIUM. Canna-like growth; waxy white flowers with a rich fragrance; fall blooming $0.50
GARDNERIANUM. Taller, with deeper green foliage and yellow flowers $1.50

HELICONIA BIBIA (WILD PLANTAIN) Each

Purplish stems, yellow flower spikes. Grown only in frostless regions $1.00

HELLEBORUS (Christmas Rose)

Large pure white flowers from early fall until January. Bloom freely when well established. They are related to the peony family. Require a semi-shaded location and rich loamy soil. Each Doz.

ORIENTALIS (Lenten Rose). Mixed hybrids $1.50 15.00
NIGER (Christmas Rose) $1.00 10.00

(23)
HEMEROCALLIS (Day Lily)

Hemerocallis have long been favorites in our gardens and are always included in any list of the most popular hardy plants. All of the varieties of Hemerocallis are desirable and beautiful. The tall, graceful, grass-like foliage is very handsome and sets off the charming lily-like flowers very effectively. They look particularly well naturalized along streams or on moist banks, and will thrive most luxuriantly in shade.

**Each Doz.**

- **AURANTIACA.** Bright orange. Fragrant, 2 to 3 feet. Late flowering. $0.35 $0.45
- **BARONI.** Fine soft yellow flowers. $0.40 $0.60
- **CITRIN.** Tall species with fine flowers from pale lemon to sulphur yellow. $0.30 $0.40
- **DR. REGAL.** Rich orange 18 inches high. Early. $0.25 $0.25
- **FLAVA (Lemon Lily).** Sweet scented, clear, full yellow: 2-1/2 feet. Flowers in June. $0.25 $0.25
- **FLORHAM.** A strong grower, 3 to 3-1/2 feet high, large trumpet-shaped flowers: rich, golden yellow, with Indian yellow markings. June and July. $0.35 $0.35
- **FULVA (Brown Day Lily).** Coppery orange, shaded crimson, 3 feet. July. $0.25 $0.25
- **KWANSO.** Large double-flowered variety with rich golden bronze flowers. $0.25 $0.25
- **GOLD DUST.** Bright yellow and back of petals bronze gold. 2 to 3 feet. May to June. $0.25 $0.25
- **Collection of six strong roots, each labelled, our selection, for $1.50**

**HIPPEASTRUM**

**Each Doz.**

- **EQUESTRE (Bardados Lily).** Free flowering flame red variety. Excellent for pot plants or outside planting in the south. $0.35 $0.45
- **EQUESTRE, fl.-pl.** A double flowering form of above. $1.00 $1.00
- **JOHNSONI.** Striped white on red ground; extra fine. $0.25 $0.25
- **PUNICEUM.** A species of Amaryllis with lily-shaped flower of brilliant orange-red with greenish ivory throat. Very good for pot culture, requiring the same care as Amaryllis. $0.35 $0.35
- **VITTATA HYBRIDS (Amaryllis Hybrids).** Finest of all cultivated Amaryllis. Exceeding all former Hybrids in size, form and diversity of color. These are easy of culture. May be planted in the open in warm sections, but potted in colder climates. Each Doz.
  - Mammoth bulbs: $1.25 $1.25
  - Large bulbs: $0.75 $0.80
  - Medium bulbs: $0.50 $0.50

**HOMERIA**

**Fall Delivery**

- **ELEGANS.** Half-hardy South African bulbs, bearing yellow or orange flowers with large blotch. This summer flowering bulb is of the Sparaxis family, requiring the same culture, but is more closely related to the Herbeita, Moraea and Tigridia. Should be grown in a sunny, sheltered location and be well mulched. Each Doz. $0.35 $0.35

(24)
HOOKERA

CORONARIA (Harvest Brodiaea). Stems 8 to 12 inches. Two large rich violet trumpet flowers ............................. 2.50

HOSTA

FUNKIA (Plantain Lily)
The Plantain Lilies are among the easiest plants to manage; their broad massive foliage makes them attractive subjects for the border even when not in flower. They succeed equally well in sun or shade. Each Doz.

CAERULEA. Lovely blue flowers 1 1/4 to 3 ft. high .................................................. 40  4.00

FORTUNEL. Pale lilac; blue green foliage ........... 35  3.50

LANCEOLATA. Very vigorous, high flowering, lilac flowers in September; 2 feet ........................................... 35  3.50

THOMAS HOGG. Well rounded green foliage with border of white. Deep lilac colored flowers ................. 40  4.00

GALVESTONENSIS. White flowers, bright green foliage, which droops by the late falls. The bulbs should be dug in the fall and planted in the spring .................................................. 25  2.50

ISMENE (Peruvian Daffodil)

CALATHINA. A grand summer flowering bulb, producing with great freedom large amaryllis-like pure white, fragrant blossoms ................. 25  2.50

SULPHUR BEAUTY. Lovely hybrid form of the above, Pale yellow flowers. Very rare ........................................... 5.00

HYACINTH

Fall Delivery

Hyacinths are very fragrant and come in a great variety of colors. They make a magnificent display when grown out-side in a bed. They are also very satisfactory when grown in pots or in glasses of water. For outdoor culture set the bulbs so that the tops will be 3 to 4 inches below the surface and 6 to 10 inches apart. For pot culture use a 6 inch pot for a bulb or a large pot for 2 or 3 bulbs, and leave the tops of the bulbs just above the surface. After potting give a good watering and set away in a cool place and cover with coal ashes or sand until thoroughly rooted, which takes from 2 to 3 weeks. Do not allow them to become dry. They may then be set in a cool, light place until the flower spikes have developed, when they may be placed wherever they are wanted.

EXHIBITION SIZE HYACINTHS Doz. 100

APPLEBLOOM. Soft pink, light center. CARDINAL WISEMAN. Bright rose, late. GERTRUDE. Rosy pink, large compact truss. L'INNOCENCE. Pure white, large bells, fine spike. JOHAN. French grey. La PEYROUSE. Clear light blue. KING OF THE BLUES. Dark blue, compact truss. BISMARCK. Sky blue, very large spike. CITY OF HAARLEM. Rich deep yellow, tall, erect spike. KING OF THE YELLOWS. Bright yellow, compact truss. DISTINCTION. Very dark maroon. LORD BALFOUR. Lilac, tinged violet. MAUVE QUEEN. Mauve. IRIS GERMANIA
(TALL BEARDED IRIS)
This beautiful class of Iris is so well known that no lengthy description is needed. It is sufficient to say that for the little effort required for growing them, no other flower gives greater joy or adds beauty to the garden, more than these magnificent rainbow tinted Iris.

The following culture suggestions may prove helpful:
Plant from August to March, the earlier the better, in a sunny or partially shaded location. Any good, rich soil will do well for Iris as long as it has good drainage. Give a mulch of old manure, but do not mix this or other fertilizer with the soil. Plant roots 15 to 20 inches apart and 1 inch deep. To avoid decay, do not plant in damp locations or give too much water at first. Divide and replant every 3 or 4 years.

Abbreviations: "S" standards or upright petals; "F" falls or lower petals.
The name after each variety refers to the originator, if known.

Recent Introductions

ALVARADO (Mohr) 1926. A fine seedling of Conquistador and Lent A. Williamson. Tall and vigorous, with blooms of deep rich purple. 40 in. $1.00

APHRODITE (Dykes) 1922. One of the most beautiful pink irises. Standards and falls are of the same pure bright violet-pink with no markings. The flowers are of good size, perfect form and sweetly scented, freely produced on 40 in. stems $3.50

ARGENTINA (Mohr) 1924. A large, tall white Caterina seedling with gold veined haft. A fine seed parent. $1.00

AVALON (Sturtevant). An exceptionally large satiny pinkish lavender of fine shape and substance. Very vigorous, well branched and tall. Blooms over a long period. 40 in. $1.00; 3 for $2.50

BALLERINE (Vilmorin) 1920. Enormous blooms with broad, light blue violet standards, waved at margins, falls broad and deeper in color. Perfect, excellent substance. Blooms well placed on tall widely branched stalk $75c

BELISAIKE (Cayeaux) 1924. S. golden brassy tan, large and rounded; F. purplish old rose, hafts yellow to cream, lined purple bronze. 38 in. $3.50

CHASSEUR (Vilmorin) 1923. Yellow, with broad standards and well rounded falls. 36 in. Late. $2.50

CONQUISTADOR (Mohr) 1928. (Junata X mesopotamica.) A very tall vigorous plant with fine foliage and very large deep mauve to light violet flowers. The size and height make it an outstanding feature in our garden. Very vigorous. 40 in. $1.75; 3 for $1.75

(26)
CORONADO (Mohr) 1925. Aglorious flower of the Asia class of Eldorado-mesopotamica parentage. Of heavier substance than Asia with flaring falls, wider branching stems, and greater vigor. S. lavender; F. red purple pansy purple. Bears a very fine flowering. 36 in. Early to late season $1.50

CRIMSON GLOW (Millet) 1924. Large handsome well shaped flowers of a uniform shade of brilliant crimson rose. S. frilled, F. petals extremely broad. A free flowering. 36 in. $2.00

DELCATISSIMA (Millet) 1914. Large wax-like flowers of excellent substance. Color soft Cattelya rose. 36 in. $1.00 each

DOMINION (Bliss) 1911. The most enormous flowers of all the Dominion race and the outstanding member because of the extraordinary development of the falls. S. light bluish violet, large, erect and of good breadth; F. deep rich violet purple, velvety, well expanded, and of exceptional substance. Pronounced orange beard. 36 in. $5.00

DUKE OF BEDFORD (Bliss) 1922. A very fine iris of the Dominion race with well formed flowers of great substance. It is a deep rich violet purple, almost a self, very velvety and brilliant. Beard orange, stalks long and widely branched. Vigorous. $3.50

GERMAIN PERTHUIS (Millet) 1924. An enormous rich violet purple self with striking orange beard. A seedling of Souv. de Madame Gaudichau. Tall, well branched, free flowering with wonderfully smooth velvety appearance. Sweet scented. 36 in. $2.00

GLOWING EMBERS (Sturtevant) 1923. S. light brownish lavender; F. very rich velvety pansy purple with orange beard and conspicuously yellow center. A rich heavy flower on a tall well branched stem. Semperflorens. 36 in. $3.50

GOLD IMPERIAL (Sturtevant) 1924. Chrome yellow throughout except for the orange beard, it has rare finish of texture and form. $3.00 each

J. B. DUMAS (Denis) 1917. S. violet rose; F. deeper tone of same color, haft rich creamy yellow, conspicuous yellow beard, orange tipped. Stalks well and widely branched. 44 in. $1.00

JEAN CHEVREAU (Cayeaux) 1923. Large flowers of fine texture. S. cream tinted buff yellow; F. milky white thickly stippled violet brown at throat and haft margins. Beard dense yellow. Distinctive and of good quality throughout. 36 in. $1.00

KING KARL (Jacob Sass) 1925. A beautiful frilled plicata. S. light pinkish cinnamon; F. cream, sprinkled Lizeran purple all over the fall and beard. Beard yellow. 48 in. $2.00

KING TUT (H. P. Sass) 1926. S. and stigmas cacao brown; F. Hessian brown; haft and beard golden yellow. $7.50

LORD LAMBOURNE (Perry) 1923. S. bronze suffused rose fawn; F. rich madder crimson. Bright yellow beard. $2.50

MADAME DURRAND (Denis) 1921. An iridescent buff, flowering with lime and amber. A wide fringed Riehen hybrid. Large flowers on tall well branched stems. 48 in. $2.00; 3 for $5.00

MADAME GAUDICHAU (Millet) 1914. S. Bradley's violet; F. brilliant blackish purple. An unusually dark velvety bicolor of fine shape and finish and of exceptional substance. Stalks high and widely branched. Growth rampant. 36 in. 50c; 3 for $1.00

ROBERT W. WALLACE (Perry) 1923. A magnificent dark pallida. S. rich violet; F. very deep purple black, beard conspicuously orange tipped. $3.00

ROSADO (Mohr) 1925. (Parisiana X mesopotamica.) A most beautiful clear soft pink, tall, strong growing and of unusual size. Hardy in Massachusetts as well as in California. 42 in. $2.50

SUNSET (Denis). The standards of this lovely iris are like cloth of gold, the falls of the same but suffused with blue violet. A strong grower, free flowering, late and scented. $1.00

YELLOW MOON (Sturtevant.) An amber yellow self of pallida habit. Long blooming, fine for mass effect. 36 in. $1.50

(27)
INTERMEDIATE HYBRIDS

These hybrids are a cross between the tall bearded Iris Germanica and the dwarf Iris pumila. As a result they are of medium height (12 to 24 inches) and flower after the early dwarfs and before the tall bearded, thus filling in the gap between these two types. They are free flowering, vigorous growers and very hardy.

IRIS PUMILA

(DWARF BEARDED IRIS)

A miniature race of Iris similar in form to the tall bearded type. These lovely little gems are early bloomers, appearing soon after the Stylosa or Winter-blooming iris have gone. Especially good for the rockery. Every iris lover should have a few at least.

UNGUICULARIS

WINTER BLOOMING IRIS

The plants start blooming in the fall and bloom throughout the winter. They grow wild in Algeria, Greece, and Asia Minor. The foliage is grass-like and the flowers are borne on stem-like parts, really elongated perianth tubes, 8 to 16 inches long. The flowers are one of great refinement and is delightful in the house. Plant preferably from August to December. We do not advise planting later than February except in balled clumps.

TALL CRESTED IRIS

Each

FIMBRIATA (Japonica). Native to Central China. The flower stems, which usually appear in February, are much branched and the individual flowers are so numerous that the display continues for some weeks.

TECTORUM. The well known Roof Iris; flat blue-purple flowers with a conspicuously fringed white crest.

MILESII. Flowers reddish purple with conspicuous white markings. The branching stems grow from 2 to 3 feet in height.

CRESTED DWARF IRIS

Each Doz.

CRISTA. Tiny wild species from North Carolina. Clear lavender with gold tinge. Will grow in any location, but prefers some shade and a good covering of leaf mold.

CRISTATA ALBA. A lovely white form of the above. Very scarce.

GRACILIPES. Dainty little Japanese crested iris. Clear lavender flowers, touched with orange. Likes part shade with a well drained soil mixed with leaf mold and plenty of moisture.

WATTII. Very rare and unique Iris from the Himalayas. Similar in growth to a dwarf bamboo. Flowers white or lightly tinged. Hardy in Southern California but should be protected well in cold frames during winter in other states.

IRIS KAEMPFERI (Japanese Iris)

LATE FALL AND SPRING DELIVERY

As these magnificent Iris become better known they gain in popularity and a field of them in bloom or a few specimens artistically arranged in the water garden is truly a lovely sight. These Iris are the last to bloom, coming into flower the first part of June and continuing for two to three weeks, they fill in a period when flowers of this attractive type are particularly welcome. They have proven hardy in a number of states, but should be covered with straw in the Northern and Eastern states to prevent freezing and thawing.

Japanese Iris may be planted in the Spring or in the Fall from September until the ground freezes. They require plenty of sunlight, a heavy, moist, but well drained soil and will stand considerable enrichment in the shape of a mulch of sheep manure. Other strong fertilizers or lime should not be used. Two or three clumps may be potted up in about a 12 to 14 inch Azalea or fern pot and started in the greenhouse or coldframe during the Winter and then placed among the aquatics, where they will bloom in the proper season.

RECENT INTRODUCTIONS OF IRIS KAEMPFERI

Each Doz.

TARTAR PRINCE. Rosy-crimson, white veins, petals phlox purple .60 6.00

CHUTSAL. Hortensia violet, veined white, inner petals phlox purple .60 6.00

ISPAHAN. Phlox purple veined white .70 7.00

MONGOL KHAN. Deep rosy-red, extra large .75 7.50

REPSIME. Blue veined white .65 6.50

SADARABAD. White overcast with pale phlox pink .75 7.50

TEMPLE FLOWER. Ivory white, heavily blended with soft bluish-violet. Veined white .70 7.00

STANDARD VARIETIES

APOLLO. Single. Pure white, pink center .30 3.00

AZURE. Double. Pure white, petals slightly wavy. Mauve-blue with darker halo around the yellow blotch at base of petals .35 3.50

BLUE JAY. Double. Sky blue, distinct white lines on each petal .40 4.00

CATHERINE PARRY. Double. Blue, overlaid rosy-red; high tufts in center, almost triple .35 3.50

CLARICE CHILDS. Single. Petunia-violet; conspicuous yellow center surrounded with blue cast. Large .50 5.00

DOBBIE CHILDS. Double. Pearl-white, deeply veined rosy plum. Center petals deep plum edged white .50 5.00

PACIFIC COAST SPECIES

The West has many beautiful Iris, all rather dwarf and suitable for the "wild flower garden" or for planting along wooded paths. Are rather difficult to transplant, but well worth the effort required to establish them. Give the same treatment as other wild species. Plenty of leaf mold is required for best results. Each Doz.

BRACTEATA. Dwarf, golden yellow ........................................... 25 2.50
CALIFORNICA. Deep blue, rather dwarf. 

GORMANI. Dwarf, narrow leaves and lovely soft yellow flowers. .75

HARTWEGGII. Yellows to deep blue. 

MACOSIPHON. Blue-purple flowers with white stripe. Fragrant. .50

MACROPHYLLA. Slender, light yellow flowers. .30

MACROPHYLLA. Flower blue and cream. Mixed only. .25

COLLECTION of ten of these lovely woodland Iris, all different and labelled separately, but our selection, $2.00. Five, all different, our selection, $1.00.

AMERICAN SPECIES AND VARIETIES

CACIQUE. Beautiful fulva hybrid. Prune-purple shade. 3.00

DOROTHY K. WILLIAMSON. Hybrid of Fulva and Foliola. Velvety purple .75

FOLIOSA. Lovely species from the South, but hardy in most states. Bright blue flowers among heavy foliage. Fine for rock-garden. .75

FULVA. Copper colored iris, native to the Southern states. Requires part shade in moist location. .75

FULVALA. Cross between Iris Fulva with Lamancea. Similar to Fulva, but more coppery. .75

FULVUS. Similar to Fulva, but more coppery. .75

HEXAGONA. A fine species, bearing lavender flowers on a tall stem. .50

MISSOURIENSIS. Pale violet with delicate markings. Native to the Rocky Mountain region. Requires moisture in growing season. .40

PRISMatica. (Cubeseed Iris) Flowers about 18 in. tall, pale lavender shade. .35

PEBIDACORUS. A water loving species with bright yellow flowers on long stem. Fine for water gardens. .30

ISTRIA. Beautiful white species with green tinge. Collected in Italy, near Fiume. .50

SYRACUSE. Fine large-flowered form of albicans collected from Sicily. .75

WILD TYPES OF POGONIRIS

These wild forms of bearded iris should be useful for hybridizing work, or interesting to those concerned in making a collection of Iris types and species.

ALBICANS. Lovely white flowering iris. Very early and blooms for a long time. .25

BILIOTTI. Low growing, dark blue iris from Asia Minor. .1.25

COMO. Lovely pallida from Northern Italy. .2.00

ISTRIA. Beautiful white species with green tinge. Collected in Italy, near Fiume. .50

NEPALENSIS. A blackish-purple form of Kochii. .35

PALLIDA DALMATICA. Similar to above, but larger. .35

PALLIDAE. Fine large-flowered form of albicans collected from Sicily. .75
IRIS SPUREA
LATE FALL DELIVERY

This group contains a greater variety of shades than found in most other species of beardless iris, ranging from almost white, and cream to deep rich yellow and from pale lavender to blue-purple. They grow from 2 to 6 feet tall and are well adapted to plant along streams or around pools or ponds. They are exquisite cut flowers and when cut keep well.

BRANIN HYBIDS

I am pleased to be able to offer for the first time the following collection of Spurea Hybrids originated by Mrs. Jemima Branin, one of our most ardent Iris lovers. Mrs. Branin has been working for a number of years with these beautiful “Butterfly Iris,” until she has now produced quite a number of new varieties, with larger flowers and loveliest shades yet introduced.

Each

ALICE EASTWOOD. Magnificent ochroleuca hybrid. Beautiful shade of rich yellow .............................................10.00

BRANIN HYBRIDS

GOLDEN GATE. Tall bold flower of golden yellow ....12.50

MARY NULTY. Lovely pure white flower, very tall ...12.50

MONNERI. Rich, golden yellow, similar to Aures, but quite hardy. Prefers moist situation ...1.00

SPUREA. Lavender-blue ...........................................75

Collection of ten of these stately Iris, full range of colors including deep cream, white and yellow, golden yellow, pale lavender to blue-purple. All different and labelled separately. Our selection, $7.50. Five all different, our selection, $3.00.

PALESTINE HYBRID IRIS
FOR EARLY FALL DELIVERY ONLY

This group contains the most curious, yet beautiful of all Iris. Their flowers are strikingly veined on white, soft violet-purple or brown ground. To grow this type of Iris successfully where winters are severe or summers subjected to occasional rains, it is necessary to dig the roots each season after the leaves have died down (about the end of June) washed, and dried off for a day or two and then stored in a box of very dry sand until time to replant. Tobacco dust added to the sand is used as a protection against aphis.

The planting should be done a few weeks before the ground freezes, three or four inches deep and then covered with a mulch of straw or dried leaves, to prevent heaving. A light frost will not injure the roots, but will kill the new growth. Therefore, the roots should be kept bone dry after planting, inasmuch as growth starts very readily upon the addition of moisture, if the temperature is mild.

ONOCYCLUS

Each

SUSIANA (Mourning Iris). Enormous flowers of grayish white veined black-maroon .........................1.50

BULBOUS IRIS--HOLLAND TYPE

BULBOUS TRIS

FOR FALL DELIVERY

One of the most satisfactory varieties to grow, being particularly hardy in most states, but should be well covered during the winter, with straw or leaves, in the East. The Orchid-like flowers are of great beauty, having many different shades and blendings of color, and if cut in the bud will keep for a long time in water. For best effect they should be planted in clumps of 25 or more bulbs or are very satisfactory placed in a long row in the hardy border. Plant in September, six inches apart and two to three inches deep. They bloom soon after the daffodil season.

ADRIAN DACKER. Early rosy lavender, extra Doz. 100 large ................................................................. 2.00 12.00

(34)
ENGLISH IRIS

EARLY FALL DELIVERY

Similar to the Holland, but later. Beautiful flowers of pure white and in all shades from pure white to deep purple, some dotted, spotted, splashed and mottled. These Iris are very hardy and should grow satisfactorily in the eastern states, but unlike other types of bulbous Iris, they need a cool, moist soil and will not succeed in a hot, dry situation. They need not be lifted more than every three years to separate and should be stored in dry sand until they can be replanted. Do not break off the side bulblets. Doz.

FRANS HALS. Porcelain blue on white __ 1.75
GRAND LILAS. White and lavender __________ 1.50

PERLE des JARDINS. Pearl, flamed light blue __ 2.00
ELECTRA. Pale blue tinted lilac _____________ 1.75
SURPRISE. Velvety indigo blue _____________ 2.00

Collection of 50 large bulbs in ten varieties, our selection, for $7.00; 25 In eight varieties, $3.75. Doz.

MIXTURE OF English iris, many varieties, all colors ___________ 1.50 10.00

BULBOUS IRIS—RARE SPECIES

BUCHARICA. Native of Bokhara, height 1 1/2 to 2 feet. Soft yellow flowers with deeper yellow on the lip of the falls. The foliage is unique, resembling a miniature corn stalk, with leaves at the axis of the leaf. Requires some protection. Each ___________ $2.50

HISTRIODES (Reticulata Type). Bright blue with a yellow ridge in center ___________ $1.50 each

HISTRIO (Reticulata Type). Similar to above. Name means "actor" in Latin ___________ $1.50 each

JUNCEA. Native of North Africa. Fragrant yellow flowers, similar to the Holland and English in form ___________ $1.50 each

PAVONIA. The true Peacock Iris from Cape Colony and botanically known as Moraea Glaukopis, Moraea being the African representative of the Iris. A fragile naturalized Iris variety that will thrive while in your garden, a wonderful white Iris with segments the size of a quarter dollar with a blue spot at the base like a Peacock eye. Stock is very scarce in America. Strong corms, 50 cents each; dozen ___________ $5.00

PERSICA. A dwarf species of the Juno type from Asia Minor; the color is white, tinged sea-green; purple blotch on falls. Requires protected location with heavy mulch or grown in pots indoors. Each ___________ $2.50

IRIS RETICULATA. A pretty little dwarf bulbous Iris. The name being Latin for "Little Net," which describes appearance of the outside of the bulb. The flowers are blue, tall and something like a Spanish Iris in shape. These bulbs are very small. Each ___________ $1.00

SISYRINCHIUM. A bulbous Iris closely allied to the Iris, while it is really a Moraea. Blooms last only a few hours ___________ $ .50 each

FILIFOLIA IMPERATOR. The outstanding type in bulbous Iris. Very hardy, tall growing, good forcer. Large bulbs, large blooms of deep blue, fall edged yellow Each Doz. Large bulbs ___________ 15 1.00

TINTANITIA. The outstanding species from Morocco. Earliest and largest of all Xiphiums. Hard to flower in cold climates unless forced. Each Doz. Large bulbs ___________ 50 5.00

AMBASSADOR. Carmine violet ___________ 1.25 9.00

IXIAS (African Corn Lily)

Fall Delivery

Attractive bulbs native to South Africa, with grass-like foliage and spikes of flowers in early spring. They close at night and remain closed on dark days. For cut flowers they cannot be surpassed. Mulch with straw or leaves 3 inches deep. Each Doz. Large bulbs ___________ 50 5.00

WEDGEWOOD. Large clear blue ___________ 1.00 10.00

TUBEROSE (Tuberose Tuberose). Sometimes called "Snakes-head" or "OwId" Iris, which botanically is not an Iris, but a curious little plant that receives its name from the finger-like tubers that form its roots. The flowers are velvety violet, which gives them a weird beauty of their own ___________ $1.00 each

VARTANI (Reticulata Type). Bright blue spots on ground. Almond scented and earliest to bloom ___________ $1.50 each

**LACHENALIA (Cape Cowslip)**

**Fall Delivery**
Small South African bulbs that easily flower in a cool greenhouse or windowbox in the early spring. Bright yellow, tinged green. Similar in shape to a miniature Hyacinth. Bloom freely over a long period of time.

**Culture:** Plant 5 or 6 bulbs in a 6 inch pot, in good, rich, well drained soil. Store in protected cold-frame until late November, then bring into conservatory or place in sunny window. Give plenty of water and occasionally liquid manure. After foliage dies down keep dry until following Autumn.

**LILIES**

Lilies are without doubt among the most beautiful and lovely of the summer flowers. They would be cultivated more generally but for the notion they are hard to grow. Some of the rarer species are, it is true; they not only stubbornly refuse to make themselves at home in the garden, unless conditions are precisely to their liking, but some of them cannot endure the northern winter without the necessary covering of litter, which many other tender plants require. Unless one goes in for Lilies to the extent of making a hobby of them, however, these can all be left to the collector and there will be quite enough species remaining to give one a lily season in the three months duration of which loveliness follows loveliness with breaks of only relatively brief length.

AURATUM (Gold-Banded Japan Lily). Undoubtedly one of the finest. Its large graceful fragrant flowers are composed of six petals of a delicate ivory-white color, thickly studded with chocolate-crimson spots and striped through the center a golden yellow; 3 to 5 feet. July to September — .25 2.50

AURATUM PLATYPHYLLUM. Also called “Macranthum.” This is a robust growing form; the stem is stouter and attains a greater height; the leaves are much broader enormous flowers, white, richly spotted yellow. Undoubtedly the choicest of all. 35 3.50

Larger size 50 5.00

BATEMANNIAE. Strong stems with 5 to 10 flowers of a reddish orange color. July-August. 3 to 4 feet 40 4.00

BROWNII. A vigorous grower with large trumpet-shaped flowers of clear white, veined outside with purplish maroon. June, July, August. 1.00 10.00

CALLUSOM. Orange red self. A rare and beautiful lily. .50 5.00

Larger size .50 5.00

CANDIDUM. The old fashioned Madonna Lily; snow white flowers. .30 3.00

CERNUUM. A deep lilac-pink, spotted wine color. Very fragrant. .75 7.50

CHALCEDONICUM. The Scarlet Turks-cap. .20 2.00

CHALCEDONICUM maculatum. Dark scarlet, spotted black at base. .50 5.00

COLCHICUM (Scovitzianum). A beautiful lemon-yellow Lily, produced in pyramid clusters of drooping, waxlike flowers. June. 4 to 5 feet 1.25 12.50

CONCOLOR. Red Star Lily. Erect flower, deep-scarlet. Dwarf. Suitable for rock gardens. .35 3.50

CROCEUM. Orange Lily. Bright orange, erect flowers. June, July. .35 3.50

HANSONII. Most desirable; not particular in its cultural requirements and extremely handsome in flower; does well in light loam. Plant among shrubs and low plants to protect young shoots, this being one of the earliest lilies to appear in the Spring. The stem reaches a height of 4 to 5 feet, carrying blossoms 2 inches across, regularly reflected, the petals being of a bright orange, spotted more or less with brown, of a wavy texture. Admirable for pot culture. June flowering .75 7.50

LILIIUM HENRYI

HENRYI. A new Japanese Lily that has made a sensation in Europe. It has the same form and appearance as the speciosum varieties, but the flowers are a bright orange-yellow. They are as hardy as a tree. Easily grown and permanent... .40 4.00

Extra large size .75 7.50

KRAMERI. Unique for its color and grows from 2 to 4 feet high. The funnel-shaped, finely formed flowers are 6 inches or more in length and as much across, of a beautiful clear pink color, often shaded blush. .50 5.00

LEICHTLINI. An uncommon kind from Japan. Pale yellow, purple spots. Very graceful. August .50 5.00

MARTAGON (Dalmaticum, Turk’s Cap Lily. A handsome Lily, bearing clusters of purple, wax-like flowers. Thrives best in partial shade. June. 5 feet 40 4.00

</table>
EASTERN LILIUM

NATIVE Each Doz.

CANADENSE. Beautiful, dainty native lily. Graceful and charming ........................................... 25 2.50
CANADENSE flavum. Yellow Canada lily .......................... 30 3.00
CANADENSE rubrum. Red Canada lily .......................... 30 3.00
CAROLINANUM. A showy lily with slender stems, bearing orange red flowers, spotted maroon. Requires a well-drained situation. July-August. 2 to 3 feet ........................................... 50 5.00
GRAYI. A native lily with deep red flowers. One of the finest for planting in shady places. Small rich red flowers, spotted maroon. July. 3 to 4 feet ............................................................... 25 2.50

PHILADELPHICUM. A handsome native lily with yellow, cup-shaped flowers, spotted maroon and shaded orange at ends of petals. Good for naturalizing. July. 3 feet. Large bulbs ............................................. 30 3.00

SUPERBUM. 3 to 4 feet. July, lowers bright red-dish orange, conspicuously spotted; easily grown and permanent ............................................. 35 3.50

LIRIOPE

Stemless lilies growing in tufts of dark green foliage. In the summer, the lilac, grape Hyacinth-like flowers are borne in spikes above the leaves and last for several weeks. Will grow in sun or shade, moist or dry ............... $ .50 each

LYCORIS

PURPUREA. An introduction from Japan, but now very scarce. The foliage is produced in Spring and ripens up in August, after which the flower stalks appear, producing flowers in clusters of 6 and 8 flowers of 6 petals each. The bud is wine-color changing to royal purple when expanded, giving a startling and beautiful effect. Perfectly hardy, 2 feet high ........................................... 1.25

SQUAMIGERA. A perfectly hardy bulb of the Amaryllis family. They produce attractive green foliage in the early spring, which later dies away, and about a month later the flower stalks appear, growing about 2 feet high and developing an umbel of large Lily-shaped delicate pink flowers ............................................. 1.00

MARICA

GRACILIS (The Flag Lily). This plant belongs to the Iris family. It grows in clumps or tufts, with dark green foliage that bends at the tips. The flower stalks are like the leaves, and the flowers are produced from the edges, near the tips. Flowers white, blue and brownish within. Each ......................................................... $ .75

MARANTA

ARUNDINACAEA VARIEGATA (Arrow-Root). A plant with Canna-like foliage growing 3 feet high, variegated with white. For summer bedding or pot-planting in cold regions. Each ......................................................... $ .75

(39)
MERTENSIAS

PULCHELLA. Rosettes of blue green leaves. Stems bearing a drooping cluster of clear blue bells, sometimes tinted with pink. Each $ .75

VIRGINICA (Virginia Bells). Porcelain-blue, turning pink with age. Grows 1 to 2 feet high. Has panicle of flowers in short, pendant clusters. Fine to naturalize with yellow daffodils. Each $ .35; Doz. $3.50

MONSTERA

DELIIOSA. Handsome climbing aroid plant with enormous, curiously cut leaves. Splendid for conservatories or "tropical" gardens. Each $1.75

EARLHAM LARGE FLOWERED HYBRID MONTBRETIAS

Montbretias are of easy culture, preferring a light loamy soil well enriched with leaf mold but no manure or chemical fertilizer should touch the roots. A little bone meal can be used and a light dressing of lime may prove beneficial. The moisture supply should be good and they thrive in the partial shade of borders or shrubbery as well as in full sunlight. If planted in the fall, mulch lightly with peat or a litter but not manure.

In severe climates, spring planting is best and they can be given the same treatment as Gladiolus. Each Doz.

GOLDFINCH. The branching heads of flowers are of good size, bright yellow with small maroon blotches at center, outer petals heavily shaded brilliant cherry-scarlet, very decorative .35 3.50

HIS MAJESTY. Scarlet shading to gold. One of the finest Montbretias in existence .1.00 10.00

JAMES COEY. Flowers very large and open, of perfect form with smooth broad petals, rich deep vermillion-scarlet with golden-orange lustre, center yellow with crimson blotches, very handsome, height, 3 1-2 feet, Award of Merit, Haarlem and R. H. S. 35 3.50

MARJORIE. Large open flowers, orange-yellow, with crimson center, a beautiful flower, perfectly flat when fully open, height, 3 feet .35 3.50

POCAHONTAS. Rich coppery scarlet, with golden lustre. Center orange with small blood-crimson blotches; flowers large and handsome, height, 3 feet .50 5.00

PRINCESS. Brilliant ruby-scarlet, flowers of fair size, center yellow with small crimson blotches, very effective, height, 2-1-2 feet .60 6.00

PRINCESS MARY. A beautiful shapely flower, pale yellow petals with red tip, and three of the petals bright crimson on reverse side .40 4.00

QUEEN ADELAIDE. Deep orange shaded red on outer side of the petals, strong grower, flowers 4 in. in diameter, Award of Merit, R. H. S. .35 3.50

(40)
QUEEN ALEXANDRA. A choice variety with erect habit of growth, chrome-yellow with carmine blotch at base of petals, late flowering, height, four feet, Award of Merit, R. H. S and Haarlem 1926. $0.50 50c
QUEEN OF SPAIN. Flowers of large size, brilliant deep golden-orange, reverse of petals golden apricot with small crimson and purple calyx, color very brilliant and effective, height, 2 1-2 to 3 feet, Award of Merit R. H. S. and Haarlem. $0.55 55c

STANDARD VARIETIES Each Doz.
CALIFORNIA. Deep golden yellow, rounded petals, a very free bloomer. $0.10 10c
FIRE KING. Large glowing scarlet-red, extra fine $0.10 10c
RAYON D’OR. Rich golden flowers, large spikes loaded with golden yellow blossoms. $0.10 10c
TALISMAN. Beautiful dark scarlet. $0.10 10c
WESTWICK. Orange red with yellow eye, fine large petaled flower. $0.10 10c
Mixture. All the above sorts. $0.65 65c

MORAEA Each Doz.
IRIDOIDES. Charming plants native to the Cape of Good Hope, are allied to the Iris and require the same treatment. The flowers resemble the Iris somewhat but the standards are absent. In color they are white, shading to a light golden yellow in the center and with occasional touches of purple. $0.50 50c
MORAEA BICOLOR. Yellow flower with a purple blotch. Resembles Japanese Iris. Difficult to establish. $2.00
MORAEA GLAUCA (Iris Pavonia). $0.50 50c

MUSCARI (Grape Hyacinth) FOR FALL DELIVERY
Beautiful little flowers for planting in masses either in shade or sun. Once planted they multiply rapidly and send up flower stems by the score each year. Also adapted for growing indoors. Plant six bulbs in a 5-inch pot. Perfectly hardy. Doz. $1.50 1.50
AMPHIBILIS. Light blue with darker tops. $1.50 1.50
ARMENIACUM. Deep cobalt blue. $0.75 75c
AZUREUS (Hyacinthus Azurceus). Cambride blue flowering in February. $0.75 75c
BOTRYOIDES FLORE ALBO. Pure white species. $1.00 1.00
BOTRYOIDES LORE COERULEA. Blue. $0.50 50c
CONICUM. Deep purple, almost black. $0.65 65c
ELEGANS. Bright blue margined white. $0.75 75c
MOSCHATUM MAJOR (Musk Hyacinth). Grey purple fading to yellow-brown. $2.00
MOSCHATUM MINOR (Musk Hyacinth) Yellow shaded purple. $2.50
PLUMOSUS (Feather Hyacinth) purple. $1.50
PARADOXUM. Large trusses of blue black color. $0.75 75c
POLYANTHUM. Light blue. $0.75 75c

NERINE (Guernsey Lily) (41)
Handsome Bulbs from South Africa

Each Doz.

FOTHERGILLI MAJOR. A magnificent plant for house or conservatory. Intense, shining scarlet. By artificial light the crystalline cells of the petals sparkle like jewels. Flowers freely 1.50 15.00

SARNIENSIS (The Guernsey Lily.) A bulbous plant for greenhouse or conservatory, producing heads of red flowers before the leaves .25 2.00

MIXED HYBRIDS. Beautiful shades in orange, pink and salmon 4.00

NACCISSUS GIANT TRUMPET

NARCISSUS

FOR FALL DELIVERY

There are no hardy bulbous plants which have more points of merit than the Narcissus or Daffodils. Perfectly hardy, growing and doing well in almost any and every position, sun or shade, moist or dry. All conditions seem to suit them although they have a preference for a good, deep soil and semi-shaded position and every vacant corner in the garden, amongst the grass, under the trees, etc., could not be used to better advantage than by filling with Narcissus, and every hardy border should have a number of clumps interspersed through it. They are equally suitable for pot culture for winter flowering. Three or four bulbs can be put into a 5-inch or 6-inch pot.

SINGLE TRUMPET DAFFODILS

All Yellow Varieties

Doz. 100

EMPEROR. Primrose perianth; rich yellow trumpet 1.50 10.00

GLORY OF LEYDON. Pale yellow perianth; long golden trumpet 1.25 8.00

GOLDEN SPUR. Bright yellow. Early 1.25 8.50

KING ALFRED. Rich yellow. One of the finest large varieties 2.50 20.00

**MME. PLEMP.** The large white petals twist gracefully, Trumpet rich yellow. Late .1.00 7.50

**VICTORIA.** A variety of great merit. Creamy white perianth, broad yellow trumpet .1.00 7.50

**INCOMPARABILIS NARCISSUS**

Doz. 100

**BERNARDINO.** A beautiful new flower. Creamy perianth, pale cup edged orange .4.50

**FRANK MILKS.** Soft clear yellow, twisted perianth; handsome flower .3.50

**GLORIA MUNDI.** Bright yellow perianth, orange scarlet cup, vigorous flower .1.25 8.50

**HOMESPUN.** Perianth, soft yellow, fine expanded cup. Red cup. Strong grower and free bloomer. Height 18 inches .1.25 8.50

**TORCH.** Large, twisted yellow perianth, bright orange red crown. Fine novelty .1.25 8.50

**WILL SCARLET.** Fiery orange-red, very broad and open. One of the most striking daffodils .3.00

**BARRII TYPE**

Short cupped daffodil, cup measuring less than one-third the length of perianth segments. Doz. 100

**ALBATROSS.** A large handsome flower, perianth white, cup pale yellow, frilled, edged orange-red. Height 18 inches .1.25 8.50

**BLOOD ORANGE.** Pale sulphur overlapping perianth, cup of orange-red, fluted at edge. Very choice .1.00 6.00

**BARII CONSPICUOUS.** Large soft yellow perianth, short cup edged orange scarlet. Very free flowering. Large mother bulbs .1.00 6.00

**FIREBRAND.** Creamy white perianth with soft lemon shading at base of brilliant scarlet cup. Height 16 inches .1.00 6.00

**RED BEACON.** Most lovely flower, ivory white perianth, slightly shaded sulphur at base, prettily fluted cup, intense orange red .3.00

**RED CHIEF.** White, with large bold flat cup and broad edge of bright crimson-scarlet .3.50

**SEAGULL.** Pure white perianth with canary yellow cup, edged apricot, fine for pots and bowls. Height 20 inches .1.25 8.50

**POETICUS TYPE**

The essential character is a pure white perianth. Doz. 100

**CHAUCER.** Fine round petals, large flat vivid scarlet cup .2.00 16.00

**DANTE.** Broad petalized perianth; cup citron-yellow, edged purplish red .2.00 16.00

**EPIC.** Handsome flower with broad, snow-white perianth, eye canary, with picotte edge of crimson .2.00 16.00

**GLOORY OF LISSE.** The improved "Ornatus" .1.50 10.00

**KING EDWARD.** Large, flat flower, flat yellow eye, with wire edge of orange scarlet .1.50 10.00

**ORNATUS.** Early, large, round white petalized flowers; yellow cup rimmed red .75 5.00

**SONATE.** A late flowering Poeticus of much refinement. Flat lemon eye with very narrow rim of dark crimson .5.00

The "Double Poeticus"—See Alba Plena Odorata.

**RECURVUS (Pheasant’s Eye).** Reflex perianth

**LEEDSII TYPE** (Star Narcissus)

Tall slender stems, flowers white or pale yellow; pointed petals.

Doz. 100

**CRYSTAL QUEEN (Giant Leedsii).** A flower of great substance, with pale primrose cup, pure white perianth. Very tall .20.00

**EVANGELINE.** Pure white perianth and lemon-yellow cup. Extra large and striking flowers .1.25 8.50

**MRS. LANGLEY.** White, very satisfactory variety for naturalizing .1.00 6.00

(43)
SOUTHERN GEM. Beautiful pure white petals, large lemon-yellow crown, a splendid flower of rare symmetry, forces well 2.00 12.50

WHITE LADY. Pale white, cupped, flowers suggest a small Eucharis Amazonica bloom, extremely hardy in wild gardens 1.25 8.50

ORANGE CUP. Creamy-white, orange cup; very free flowering 1.00 7.50

TRIUMPH. Perianth pure white, fluted golden cup 1.00 7.50

OPIHIOPGON (Snake’s Beard)

JABURAN. This plant resembles the Liriopes in leaf and habit of growth, but it is a more robust plant with white flowers. Excellent for shady locations and growing in pots or boxes .35 3.50

ORNITHOGALUM FOR FALL DELIVERY

ARABICUM. Umbels of large white flowers with black base produced on tall spike. Hardy in the south but should be protected or grown inside for cold climates .20 2.00

UMBELLATUM (Star of Bethlehem). Dwarf variety sometimes seen in old gardens, growing in great profusion. Splendid for naturalizing .15 1.50

THYSROIDES (Chineherinchee) Rare species from South Africa: flower spikes in pyramidal shape with the buds of straw color changing to pure white. Is not hardy, but should make a good subject when forced, or splendid for outdoor planting in the south .50 5.00

RANUNCULUS FOR FALL DELIVERY

Large flowering varieties. Should be known better for their excellent keeping qualities as a cut flower. Very beautiful for borders or groups. The bulbs have miniature tooth-like projections and should be planted points down. Soak the bulbs overnight and plant 1 inch deep and 6 inches apart in a semi-shaded location. Plant from September to November.

TURBAN TYPE (Fully Double) Doz. 100

HERCULAS. Snow white 75 6.00

ORANGE BEAUTY. Beautiful orange, early 75 6.00

PRIMROSE BEAUTY. Lemon yellow, late 75 6.00

ROMANO. Fire red, early 75 6.00

GROOTVORST. Beautiful rose pink 75 6.00

MIXED. Above varieties 75 6.00

FRENCH MIXED. Singles and semi-doubles, black eye .65 4.75

RENEALMIA

Native of Porto Rico. Yellowish flowers in scarlet bracts which remain on for a long period .50 5.00

SCILLA PERUVIANA (THE CUBA LILY)

Large spike of flowers, 6 to 12 inches tall. Desirable for pot culture or planting in the garden. Each Doz.

Mixed shades of light lavender to purple 3.50

COERULEA. Blue .25 2.50
SCILLAS (Squills)
FOR FALL DELIVERY
These flourish in sun as well as in shade under trees. They are not particular about the soil in which they grow. They are ideal for the wild garden but are not to be despised in the border, especially if they are left alone for two or three years without being disturbed in any way. They are splendid in the rock garden. Produce drooping, bell-like flowers.

(45)
SMILACINA

AMPLEXICAULIS. Related to the Solomon's Seal. It forms large clumps with stems a foot or two long, handsomely leafy, with white flowers. The fruits hang long and are pretty. One of the very best plants for shaded places.

SPIRaea (Astilbe)

Beautiful, feathery house plant of delicate shades. Can also be used for outdoor planting.

AMERICA. Lilac-rose, handsome foliage

GLADSTONE. Finest white, large flowers

QUEEN ALEXANDRA. Beautiful pink, strong grower and free bloomer

SPREKELIA

FORMOSISSIMA (Jacobean Lily). Brilliant flowers of dark crimson, with narrow reflexing and spreading petals. Native species from Mexico.

STERNBERGIA

LUTEA. Dwarf yellow flowers resembling a Crocus, blooming during August and September in great profusion. Each bulb produces 4 or 5 flowers

STREILITZIA

REGINAE (Bird of Paradise Flower). Beautiful flowers, which resemble birds about to take flight: gayly colored in deep blue and orange. A lovely subject for the conservatory or patio. Very rare. Small plants.

THALIA

DIVARICATA. A magnificent native ornamental bog plant which may be grown in the North as easily as a Canna. The enormous leaves with red midribs, resembles a Banana and are 2 to 4 feet tall. The purplish flowers are borne on central stems 6 to 10 feet tall. An excellent plant for the South

TIGRIDIA

Sometimes called Mexican Shell Flower; one of the most showy of summer flowering bulbous plants; blooms from midsummer until frost, grows about 2 feet high and produces large, wide-open triangular blossoms often four to six inches across. The colors and markings are very brilliant, being golden yellow, spotted and blotched with bright red. Clumps of them, planted in the border, are most gorgeous. The culture is the same as for gladioli.

PAVONIA

ALBACA CARMINA. Orange with red spots

ALBACA GRANDIFLORA. White with rose spots

ALBACA CANARIENSIS. Light yellow with scarlet spots

ROSEA. Rose with white spots

SPECIOSA. Scarlet red with yellow spots

Mixed Hybrids

(46)
TIGRIDIA HYBRID

TRITELEYA (Leucocoryne)
FOR FALL DELIVERY
Star-shaped flowers of light blue shade, growing 4 to 6 inches high. Gives a pleasing effect when planted as a border. Flowers one to one and one-half inches in diameter, segments violet streaked through the center. Hardy. Native of Argentine.

Doz. 100

UNIFLORA. Light blue .50 3.50

TRITOMA (Torch Lily)
Showy decorative plants, bearing flower spikes from golden-yellow to orange scarlet. An excellent plant for the perennial border.

Each Doz.

CHRYSANtha. Bright lemon-yellow. 4 to 5 feet tall
EXPRESS. Early flowering. Light yellow turning to reddish orange with age
PFITZERI. Beautiful flame red; 3 to 4 feet high.
A prolific bloomer
RUFa. Orange yellow; tall slender flowers and foliage
R. WILSON KERR. Large spikes of bright orange-scarlet
TUCKI. Light orange yellow and red. Early June.

Collection of six, labelled separately, our selection, for $2.00

TRITONIA
CROCOSMIA. Spring blooming species, large flowers, light tan in color. Resembles a Freesia and follows them in blooming season

ROSEA. A very lovely species, bearing in summer dainty spikes of pretty rose colored tubular flowers. A charming little plant, distinct and very free flowering; while the individual flowers of this variety cannot be compared with many of the other named sorts, it is a plant well worth growing and splendid for table decoration, being very light in its habit

TULIPS
DARWIN TULIPS
FOR FALL DELIVERY
Darwins are the most satisfactory of all tulips. They are stately in appearance, attaining a height of 24 to 30 inches, and producing beautiful globular flowers of heavy texture in a large range of colors. They blossom in April and May and are unsurpassed for bedding and cutting.

Tulips can be planted from October till late in December. They require a moderately rich soil, which should be well drained. If the soil is in poor condition use a little bone meal or well rotted manure. Plant the bulbs 6 or more inches apart and set the tops 3 inches below the surface. If the soil is heavy, place a small quantity of sand at the base of each bulb. They will remain in bloom for a longer period of time if planted in a light, shaded location.

BARTIGON. Brilliant red.

(47)
BARRONNE DE LA TONNAYE. Lovely rose, margined light.

CLARA BUTT. Soft salmon rose.

DREAM. Delicate lilac, very tall.

EUROPE. Bright rose, very tall.

GRETCHEN. Soft pink.

KING HAROLD. Very large, dark red.

LA TULIPE NOIRE. The nearest to black tulip.

MACONI. Purple violet, very fine.

MELCIETTE. Lavender, beautiful shade.

MR. FARNCOMBE SANDERS. Scarlet red, best of its color.

ORION. Dark scarlet, blue center, enormous flower.

PRIDE OF HAARLEM. Brilliant rosy carmine, largest of all.

PRINCE OF NETHERLANDS. Deep cerise rose, very large.

REV. A. EWANK. Heliotrope lilac, very fine.

VALENTINE. Light violet.

YELLOW DARWIN. Beautiful golden yellow.

Doz. 100
Price on all above varieties .75 5.50
Mixed varieties (imported) .65 4.50
Mixed, California grown .50 3.00

COTTAGE TULIPS, RECENT INTRODUCTIONS

AVISO. Bronzy orange .2.50 20.00
AVIS KENNICOTT. Rich yellow, black base, large flower .2.00 15.00
BEAUTY OF BATH. Soft rosy lavender bordered with pale yellow edge to the petals .1.50 12.00
NECTAR. Glorious fiery crimson coloring with pure white base .2.00 15.00
INGELSCOMBE YELLOW. Also called yellow Darwin, also very large .2.00 15.00
JUPITER. Long stemmed large flowering variety .2.00 15.00
UNION JACK. Lilac, white striped .2.00 15.00
VIRIDFLORA. Green edged yellow .2.00 15.00

Doz. 100
COTTAGE TULIPS, STANDARD VARIETIES

This beautiful class is also very popular, although the stems are not quite so long as in some of the Darwin varieties. They, however, come in certain forms and colors not to be found in the other group.

BOUTON D'OR. Pure golden yellow.
GESNERIANA MAJOR. Scarlet red with black center.
INGELSCOMBE PINK. Best salmon pink, very large.
MOONLIGHT. Beautiful soft yellow, early.
ORANGE KING. Glowing orange.
PRICE OF ORANGE. Terra cotta with orange.
PRINCE OF ORANGE. Terra cotta with orange.
UNION JACK. Lilac, white striped.
SUNRISE. Light brown changing to yellow.
VELVET KING. Dark purple, very fine.

Doz. 100
Price on above varieties .75 5.50

BREEDER TULIPS
They are very similar to the Darwins in their tall, strong growth, and with even larger flowers, and bloom about the same time, but have an entirely different range of colors, comprising bronze, terra-cotta, orange brown and other artistic tones that are altogether wanting in the Darwin.

APRICOT. Dull bronze, shaded apricot; large flower.
ALCIDE. Yellow tinted bronze.
BRONZE KING. Very fine dark bronze.
BRONZE QUEEN. Buff color and orange.
CARDINAL MAN. Wine red, glowing brown.
GRAND MAITRE. Deep purplish violet.
MADEA. Crushed strawberry shaded heliotrope.
PRINCE OF ORANGE. Terra cotta with orange.
SUNRISE. Light brown changing to yellow.
VELVET KING. Dark purple, very fine.

Doz. 100
Price of above varieties .75 5.50

LILY FLOWERING TULIPS
A new class of tulips very beautiful and decorative. A cross between Darwins and Tulipa Retroflexa. The flowers have the grace and shape of Liliums as the name indicates.

Doz. 100
ADONIS. Rosy-red, tall stem .1.25 9.00
ARTEMIS. Carmine rose with neat white base .1.25 9.00
ECLIPSE. Orange-yellow .5.00 30.00
SIRENE. Satin rose, strong and long stem .1.25 9.00
SOLFATARE. Lily flowered, pale primrose .1.25 9.00

TULIPS—BOTANICAL SPECIES
For Rock Gardens
The cultivation of these tulips is very simple. They thrive in the ordinary soil of the rock garden, provided it is well drained.

AUSTRALIS. Yellow, reddish outside .25 2.50
CLUSIANA. White. Cherry outside .15 1.25
CORNUTA STENOPETALA. Red and yellow .25 2.25
ECLIPSE. Fiery scarlet, black center .1.25 9.00
Fosteriana. Brilliant red .2.50 20.00
CLEOPATRA. Orange-scarlet. Black blotch center .50 5.00
HAGERI. Red, black and yellow .1.25

**VALLOTA Purpurea (Scarborough Lily)**

A native of South Africa and one of the most attractive of the Amaryllidaceae family. Many flowers of bright red color. Same culture as Amaryllis. Very scarce .........................................75 7.50

**VIRIDIFOLIA.** Cape bulb. Many long glossy green leaves, wavy on the edge. From the center of these leaves appears a stout stem 1 1/2 to 2 feet high, topped with a dense spike of 25 or 30 flowers of a delicate old rose shade. Requires a shady location ........................................ 3.50 each

### WATERLILIES FOR FALL DELIVERY

A beautiful flower from South Africa, and one which thrives remarkably well in our climate; plants grow from three to five feet high, and produce great spikes of large flowers, which are especially valuable for cutting, lasting a long time in water. The plants succeed best in a rich loam, with liberal dressing of well-rotted manure.
